

Biz Architecture Roadmap

**Framework, Organization, Services,
Competencies, & Responsibilities**

Biz & IT Alignment

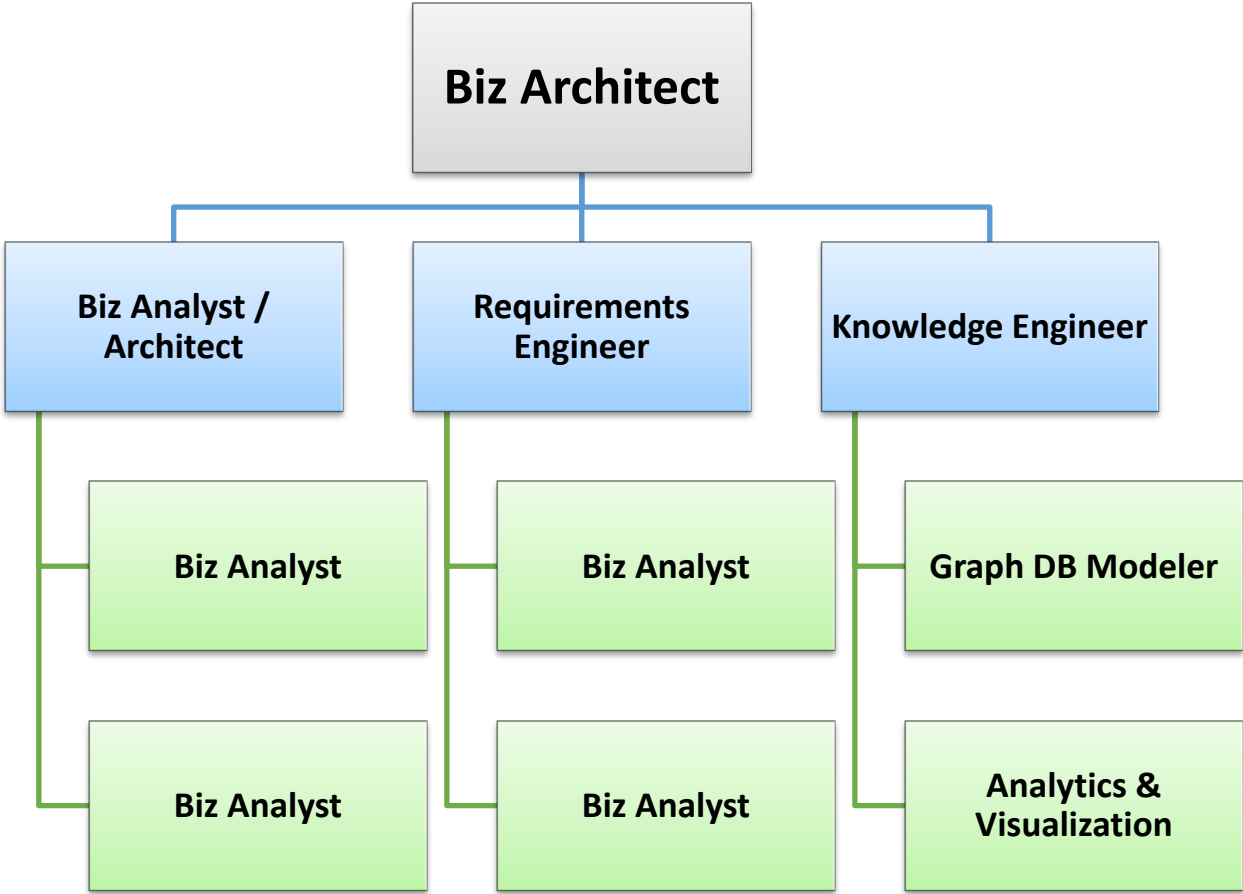

Business Architecture Staffing Model (draft)

The staffing model can scale several ways across the business:

- (1) Matrix within each BU
- (2) Shared Service for all Bus
- (3) DNA Focus (60% Execution)

Unknown effort with integration across all systems. Requires tight coupling with Demand Mgmt. & PPM (all BUs & IT) to preserve fidelity and changes for each map.

Combination of FTEs + Automata

Business Architecture Service Portfolio

Aligning, Mapping, and Educating, and Facilitating within these services

Strategic Modeling

Business Modeling
Strategic Mapping
Stakeholder Mapping

DNA Promotion

Strategy & Operational Alignment
Prioritized Demand & Execution
Vertical & Horizontal Alignment

Relationship Modeling

Scenario Modeling
DNA Relationship Mgmt.
Systems & Asset Mapping
Biz Arch Integrity

Operational Modeling

Service Modeling (CoP)
Modeling Process & Measures
Modeling (Biz, Funct., Tech)
Alignment with Domain Assets

Capability Mapping

Horizontal & Vertical Mapping
Analytic Assessment
Operational Alignment

Requirements Modeling

Requirements Optimization
Requirements Analytics
Requirements Reuse

Compliance Modeling

External (Regulations & Laws)
Standards (Ext. & Int.)
Quality & Constraints
Policy Mapping

Demand thru Execution Flow

Demand Modeling
Execution Flow Prioritization
Problem, Idea, Request Mapping
Relationship Mapping to Scenario

Impact & Decision Optimization

Impact Analytics & Monitoring
Dashboard Modeling
Problem & Decision Modeling
Decision Measures & Optimization

Competency Model (Business Architect)

• Domain

- Strategic Planning
- Operational Planning
- Liquid Planning (PPM)
- Aerospace MFG
- Transportation Services
- Supply Chain Model
- Functional Operations
- Technical Transfer
- Product Dev (R&D)

Soft Skills

- Strategic Thinking
- Systems Thinking
- Critical & Lateral Thinking
- Good with Uncertainty
- Vertical & Horizontal Communications
- Pragmatic & Organized
- Adaptable

Functional

- Risk Profiling
- Requirements Planning
- Lifecycle Management
- Scenario Modeling
- Change Management
- Innovation & Demand Mgmt.
- Impact/Sensitivity Analysis
- Service Modeling & Mgmt.
- Strategy Modeling
- Problem Modeling
- Decision Modeling
- Project Management
- Value Measurement
- Stakeholder Engagement
- Continuity Management
- Business Modeling
- Learning & Sustainability

Technical

- Information Modeling
- Process Modeling
- Data Integrity
- Relationship Modeling
- Requirements Planning
- Demand Modeling
- Measures Modeling
- Integration & Versioning
- Business Analysis Skills
- Familiarity with AI, ML
- Influence Diagrams
- Systems Engineering
- Correlation Matrices
- Predictive Analytics
- Systems Modeling
- Familiarity with Arch Methodologies
- Graph DB & Knowledge Engineering

Business Architect Role & Position

- The Biz Architect will have a direct reporting relationship to the Biz Leaders (TBD) and a dotted line responsibility to the SIA Lead.

The Business is (A) accountable & (R) responsible for the structures & content covering the Business Architecture.

- The Biz Architect will need to establish a collaborative across all business areas and will be responsible for managing a team of engineers and analysts to oversee and adapt the content, context, and relationships across all the “maps” to support:
 - Impact Analysis
 - Reporting & Dashboards
 - Prioritizing Execution (for change)
 - Alignment with Operational Concerns

Business Architecture Staffing Plan

- A team of modeling engineers will report to the Biz Architect. Initially, we are suggesting a lightweight structure to bootstrap the operations and establish a discipline around Biz Arch as we formalize the structures, content, and relationships.
- The Biz Arch & engineers will work closely with the the Data / Information Architect in IT to establish standards, align on terms (glossary & semantics), and formalize meta data around systems to align with the business.
- The engineers will be responsible for establishing, guiding, mentoring, and directing the Biz Arch and it's evolution as it matures. Each of the engineers will have one or more Biz Analysts supporting their efforts and will be guided by the Principle Biz Analyst (who will establish a discipline around all aspects of biz analysis)

Business Architecture Positioning with Biz

- Due to the dynamic nature and domain expertise required to build and maintain the Business Architecture, the placement of the Biz Arch Team within the business is critical.
- The Biz Arch Team will spend a significant amount of time (initially) establishing the scaffolding around the DNA (starting with the Strategy, building out the Operations = services, and then scaling up the Execution).
- Once the scaffolding is in place (strategy & operations), the team will shift their focus around Execution to extend the Biz Arch using scenario-based modeling to evolve and adapt the structures, content, context, and relationships using an incremental approach*

*** Scenarios will reveal themselves through ongoing change**

Business Architecture RACI Model

RACI Model (Artifacts Only)										
		Responsible	Accountable	Consulted	Informed					
		R	A	C	I					
DNA	Artifacts	Biz Architect	Biz Arch Team	Tech Architects	Tech Services	Biz Services	Biz Leaders	Biz Governance	Tech Governance	PMO
Strategy	Capability Map	A	R	I	I		C	C	I	
Strategy	Strategic Map	A	R	I	I		C	C	I	
Strategy	Scenario Map	A	R	I	I		C	C	I	
Strategy	Innovation Process	C	A	I	R	R	R	C	C	C
Strategy	Decision Modeling	A	R	C	C	C	I	C	I	
Strategy	Measures Model (strategic)	A	R	C	C	C	I	C	I	
Execution	Demand Mapping	C	A		R	R		I	I	C
Execution	Problem / Solution Mapping	C	A		R	R		I	I	C
Execution	Initiative Mapping	C	A		R	R		I	I	C
Execution	Prioritization Model	C	R		C	C	C	C	C	A
Execution	Solution Architecture	I	C	A	R	C		C	C	I
Execution	Solution Design	I	C	C	A	C		I	C	I
Execution	Requirements Map	I	A		C	C		I	I	I
Execution	Story (Job) Map	I	A		C	C		I	I	I
Execution	Outcome Map	I	A		C	C		I	I	I
Operation	Service Catalogue	C	A	I	R	R		C	I	I
Operation	Process Models	C	A	I	R	R		C	C	I
Operation	Measures Model (operational)	A	R	C	R	R		C	C	I
Operation	Metadata Model	R	C	A				C	C	I
Operation	Biz Arch Auditing & Assessment	A	R	I		I	I	C	I	I
Operation	Organization Map	A	R			C	C	C	C	I
Operation	Stakeholder Map	A	R			C	C	C	C	I
Operation	BIZ Arch Automation (Design)	A	C	R	I	I	I	C	C	
Operation	BIZ Arch Automation (Build & Maint)	I	C	A	R	I		C	C
