

Organisational Change

Guide for stewarding change and aligning leadership

Leadership

- ❑ A leader shapes and shares a vision which gives pointers and direction to the work of others.
- ❑ Leadership involves unleashing energy, freeing, growing, and building.
- ❑ Leaders influence the direction of a group through:
 - structuring (framing) the situation.
 - controlling group behaviour.
 - personifying the group.
 - helping the group achieve its goal and potential.
- ❑ Leaders need willing co-operation of the followers.

Source: Coleman, J.C. (1969) quoted in Smith M. (1991) *Analysing Organisational Behaviour*,

“One best way” - traits of leadership (ii)

- ☐ Drive * (achievement, ambition, energy, tenacity, initiative)
- ☐ Leadership motivation (personalised or socialised)
- ☐ Honesty and integrity
- ☐ Self-confidence * (including emotional stability)
- ☐ Cognitive ability (the ability to marshal and interpret a wide variety of information)
- ☐ Knowledge of the business
- ☐ ability to cope with change and uncertainty
- ☐ creative thinking (able to handle ‘messes’ or ‘soft problems’)

The Managerial Grid

A nine-by-nine matrix outlining 81 different leadership styles.

Contingency Theory 5: Quinn's Competing Values

The basic idea is that leadership styles should fit the overall organisational model. The organisational models are:

- ❑ The team: flexible but inward looking.
 - Leader is a supporter, facilitator.
- ❑ The adhocracy: flexible and outward looking.
 - Leader is an innovator, broker.
- ❑ The firm: stable but outward looking.
 - Leader is task oriented, directive.
- ❑ The hierarchy: stable and inward looking.
 - Leader is a monitor, co-ordinator.

Dunphy & Stace Change Matrix

	Type of Change Enacted (following environmental forces for change)			
Style of Change Mgt.	Fine Tuning	Increm. adjustment	Modular transform	Corporate transform
Collaborative	Type 1 Participative Evolution		Type 2 Charismatic Transformation	
Consultative				
Directive	Type 3 Forced Evolution		Type 4 Dictatorial Transformation	
Coercive				

Forces for and against change

❑ Driving forces for change

- *external forces (e.g. constraints from suppliers, customer needs)*
- *internal forces (e.g. org growth, office politics, restructuring)*

❑ Driving forces against change

- *Individual resistance*
- *organisational resistance*

**Leading change will inevitably also be concerned
with overcoming resistance to change**

Underlying Reasons Why Individuals Resist Change

Why Organisations Resist Change

- ❑ Organizations are coalitions of interest groups in tension
- ❑ Where balance (ultra-stability, equilibrium) of forces hammered out over a period
- Change upsets this balance

Beer et al's six steps to effective change

- ☐ Mobilise commitment to change through joint diagnosis of business problems.
- ☐ Develop a shared vision of how to organise and manage for competitiveness.
- ☐ Foster consensus for the new vision, competence to enact it, and cohesion to move it along.
- ☐ Spread revitalisation to all departments without pushing it from the top.
- ☐ Institutionalise revitalisation through formal policies, systems and structures.
- ☐ Monitor and adjust strategies in response to problems in the process.
