

Interprofessional Collaboration in Health Care

“Dean’s Clinic”

Jay A. Perman, M.D.

Dean, College of Medicine

Vice President for Clinical Affairs

Elsie Stines, MS, CRNP

Instructor, Department of Pediatrics

Director, Collaborative Programs

Why Interprofessional Education and Practice?

Safety and Quality

- All health professionals should be educated to deliver patient-centered care as members of an interdisciplinary team, emphasizing evidence-based practice, quality improvement approaches and informatics.

Why Interprofessional Education and Practice?

Workforce

- Growing shortage of physicians could be reduced if nurse practitioners and physician assistants play a larger role in patient care.

Interprofessional Education Defined

- Occasions when two or more professions learn from and about each other to improve collaboration and quality of care.
- Occasions when students in one health profession are taught by faculty from more than one profession.

Center for Interprofessional Healthcare Education, Research and Practice at the University of Kentucky (in formation)

Participants

- Academic Medical Colleges
 - Dentistry
 - Health Sciences
 - Medicine
 - Nursing
 - Pharmacy
 - Public Health
- The University
 - Arts and Sciences
 - Business
 - Law
 - Social Work
 - Others

Center for Interprofessional Healthcare Education, Research and Practice at the University of Kentucky (in formation)

Participants

- Working Groups
 - AHEC Opportunities and Pilots
 - IP Simulation-based Education
 - Deans' Honors Colloquium
 - Scholarship (Research/Outcomes and Evaluation)
 - Community Engagement
 - Teaching of Team

Dean's Clinic

- Model of interprofessional practice
- Patient and Family
- Learners:
 - M1s – longitudinal clinical experience
 - M3s – pediatric ambulatory experience
 - Undergraduate students
 - Pediatric residents –
 - Pipeline program students
 - Other disciplines: PA, Nutrition
- Providers:
 - Pediatric subspecialist
 - Pediatric subspecialty based NP (COM Faculty Member)
 - Staff

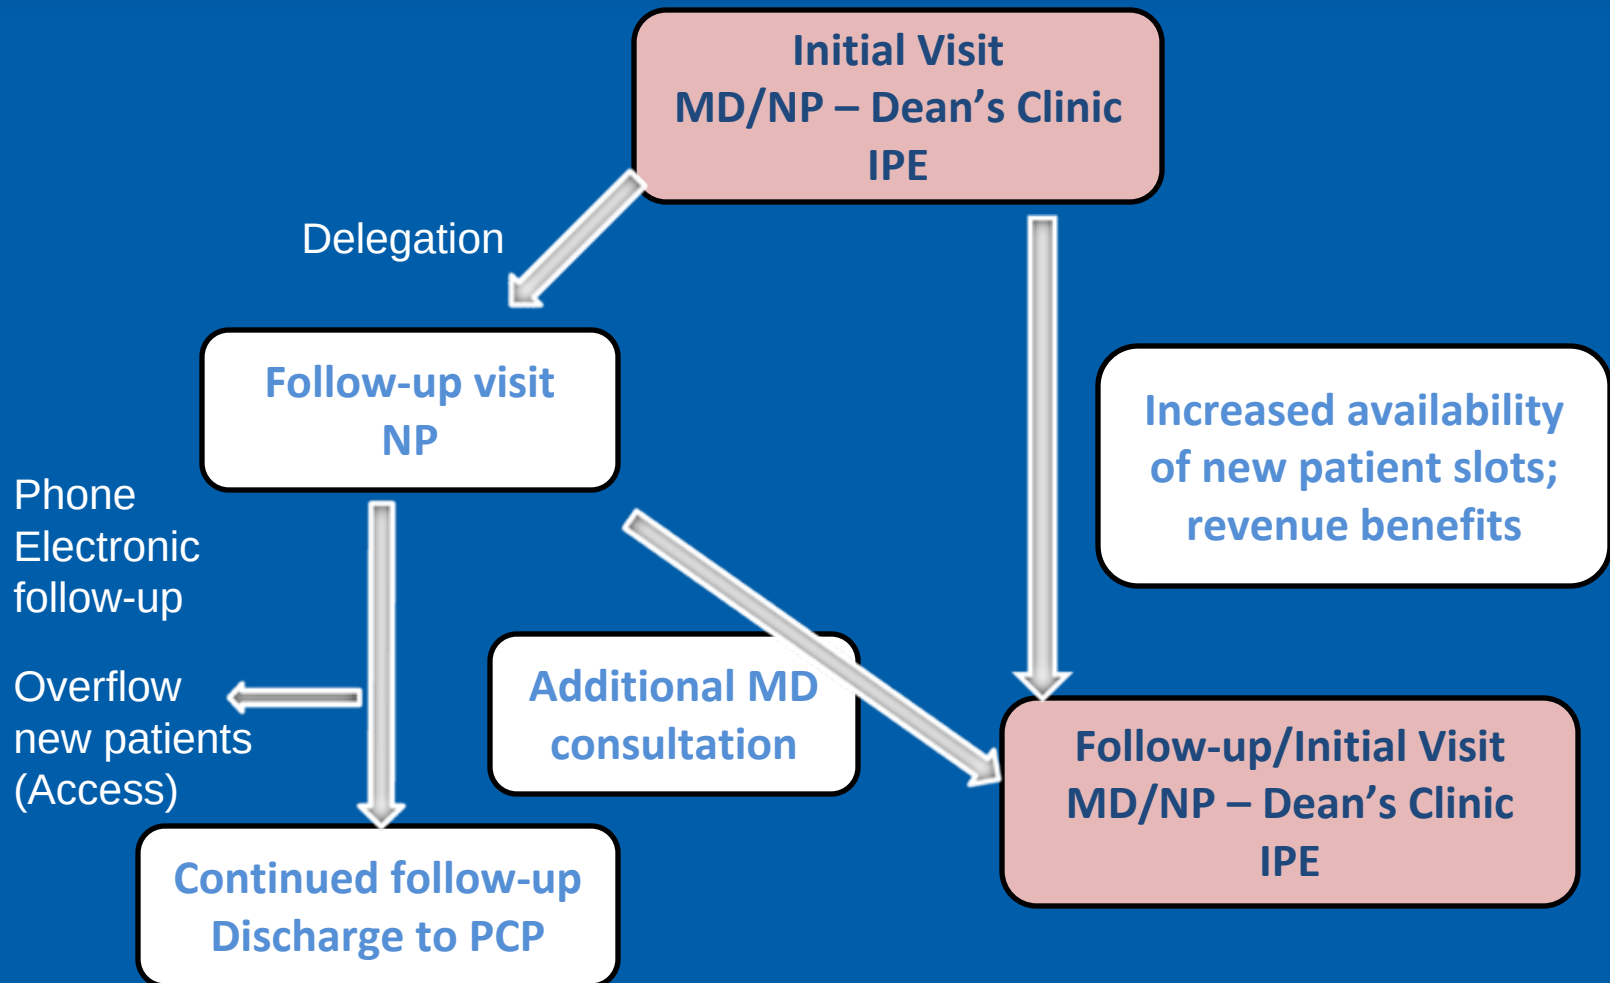

The Nurse Practitioner Perspective

- Becoming a nurse practitioner
- Graduate school experience
- Job experiences
- Perman/Stines experience
 - Chairman/Dean's Clinic

Dean's Clinic

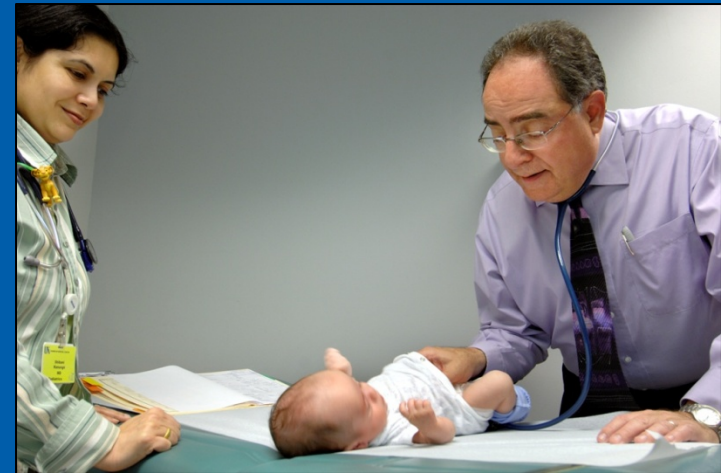

Model of Practice

Education Value

- Learning objectives
 - Interprofessional practice
 - Demonstration of support for one another to fully use separate and shared skill sets
 - Subject matter – secondary
- Medical student and resident teaching by nurse practitioner

Who Brings What?

- Both
 - Patient evaluation and management
- Physician
 - Insight into mechanisms of disease and treatment for the team and the patient
 - Literature
 - Transmission of knowledge to team members
- Advanced Practice Nurse
 - Patient education and counseling
 - Availability
 - Follow-up
 - Gender sensitivity (*if* team members can offer)

How We “Leverage” Dean’s Clinic

- “Walking the Talk” on interprofessional healthcare practice
- Access
 - Comfort with NP
 - PCP/NP interaction
- Informal Continuing Medical Education
- Collaborative research
- Cultivation of medical student applicants
- Shared “pipeline” vision

Truly Collaborative Practice

- Trust/Respect
- Team effort – interdisciplinary (not supervision)
- Complementary practice
 - Similar practice styles
 - Communicate person-to-person with the patient in the office setting
 - Shared vision
- Reciprocal consultation
 - Sharing knowledge, expertise and information
 - Exchange of ideas
 - Goals of treatment

Barriers to Interprofessional Practice

- Lack of knowledge of NP role and scope of practice
- Perception of competition
- Physician and nurse attitudes
- Incongruent practice styles – lack of “chemistry”
- Patient/family resistance to NP or multiple providers

Solutions

- Interprofessional education and training
 - Incorporate collaborative practice models in medical and nursing education and training programs
 - Medical students, residents, and NP students should have opportunities to work together in clinical settings
- Establish effective institutional and professional association dialogue to promote IPE and measure its effectiveness
