

Value-Driven Methodology

Overview

Key Milestones

- Define domain model
- Define customer focus methodology
- Define action plan to capture unmet needs
- Begin interviews with key stakeholders
- Complete qualitative analysis
- Draft survey for quantitative analysis
- Conduct survey and capture data
- Present recommendations

Based on the Strategyn Methodology (see next slides)

What is a Job ?

- **A job...**

- Defines **the high-level goal** the customer is trying to accomplish **or problem** they are trying to resolve
- Defines **an action, application or process** for which one or more products or services are presently being hired or may be needed

Job Illustrations

- Participate in services
- Perform a mitzvah service
- Purchase a product or service
- Obtain counseling
- Obtain education
- Performing surgery
- Share knowledge
- Printing a document
- Study Torah

Example: Job of Storing & Retrieving Music

Outcomes

Increase the number of songs that are available for selection

Minimize the time it takes to locate a song when critical information is missing, e.g., the name of the song, the artist, etc.

Minimize the likelihood of inadvertently selecting the wrong song

Minimize the time it takes to queue the songs in the order in which they are to be played

Minimize the time it takes to remove a song from the queue

What are outcomes ?

- Customers intrinsically use “metrics” to define the successful execution of a specific job
- These metrics (or desired outcomes) ARE the customer’s needs
- If a desired outcome is both important and unsatisfied, it is unmet
- The more important and less satisfied an outcome is (the more unmet it is) the greater it represents an opportunity for value creation
- ... customers may not be able to articulate a solution, but they can certainly articulate what outcomes they want to achieve

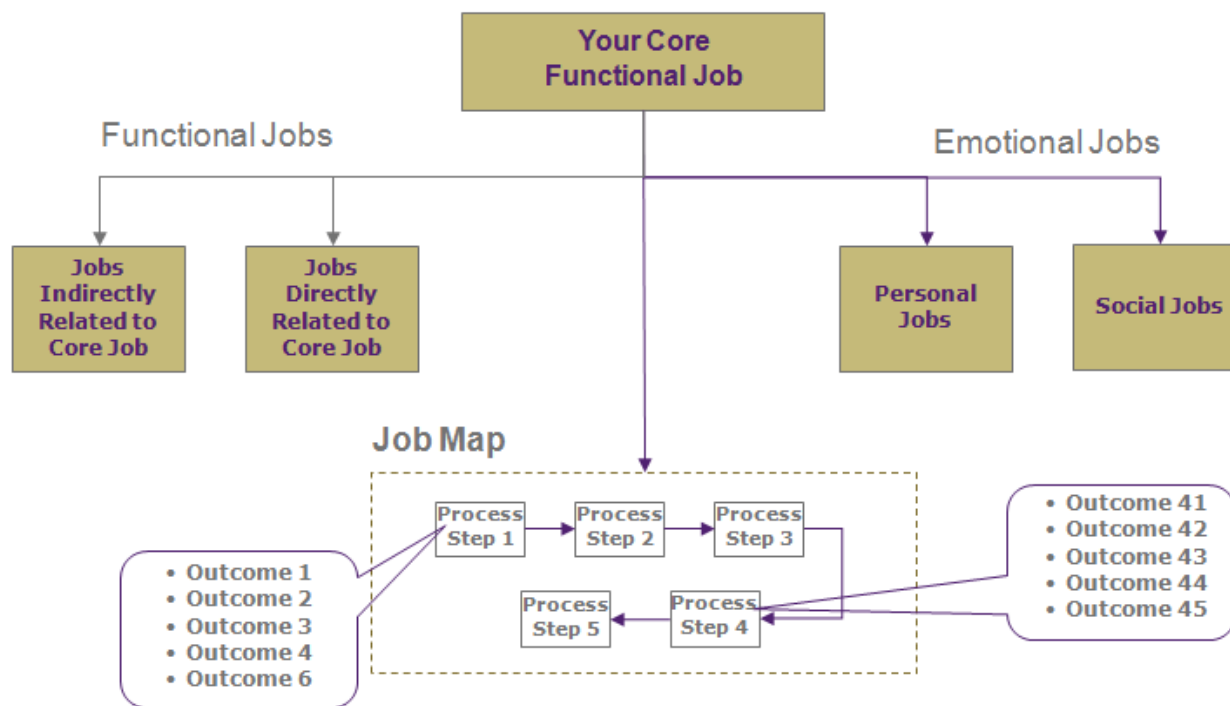

Customers couldn’t articulate their “need” for a microwave oven, but they did know they wanted to:

- Minimize the time it takes to prepare a meal
- Minimize the time it takes to clean up after cooking
- Minimize the likelihood of overcooking a meal
- Increase the likelihood that the food is cooked evenly throughout

Model for Relating Jobs & Outcomes

Job Executor:

Desired outcomes are the metrics customers use to measure the successful execution of a job.

Capturing & Measuring Value

Administer a survey (web, phone) to a significant population

How <u>important</u> is it that you are able to....?	Not Important At All	Somewhat Important	Important	Very Important	Extremely Important
Increase the percent of plants that emerge at the same time	☐ ₁	☐ ₂	☐ ₃	☐ ₄	☐ ₅
Minimize the time it takes the plant to absorb nutrients once they are planted	☐ ₁	☐ ₂	☐ ₃	☐ ₄	☐ ₅

How <u>satisfied</u> are you with your ability to....?	Not Satisfied At All	Somewhat Satisfied	Satisfied	Very Satisfied	Extremely Satisfied
Increase the percent of plants that emerge at the same time	☐ ₁	☐ ₂	☐ ₃	☐ ₄	☐ ₅
Minimize the time it takes the plant to absorb nutrients once they are planted	☐ ₁	☐ ₂	☐ ₃	☐ ₄	☐ ₅

$$\text{Opportunity} = \text{Importance} + \max (\text{Importance} - \text{Satisfaction}, 0)$$

Identifying & Prioritizing Opportunities

Modeling Value Across the Continuum of Care

Driving Sustainable Value
