

Section 4 – Agenda

The idea of enterprise architecture

More than IT - part of the business

Constructing the architecture

Outputs from EA

Issues with architecture today

Moving to the next perspective

Enterprise Landscape Architecture

- Everything that is going on outside the enterprise with possible impact on the enterprise

Strategic Business Architecture

- All the options, decisions, considerations, assumptions that go into deciding on the direction of the enterprise as it responds to the landscape

Business Architecture

- All the capabilities, resources, assets, skills, intellectual property needed to carry out the direction.

Enterprise Architecture

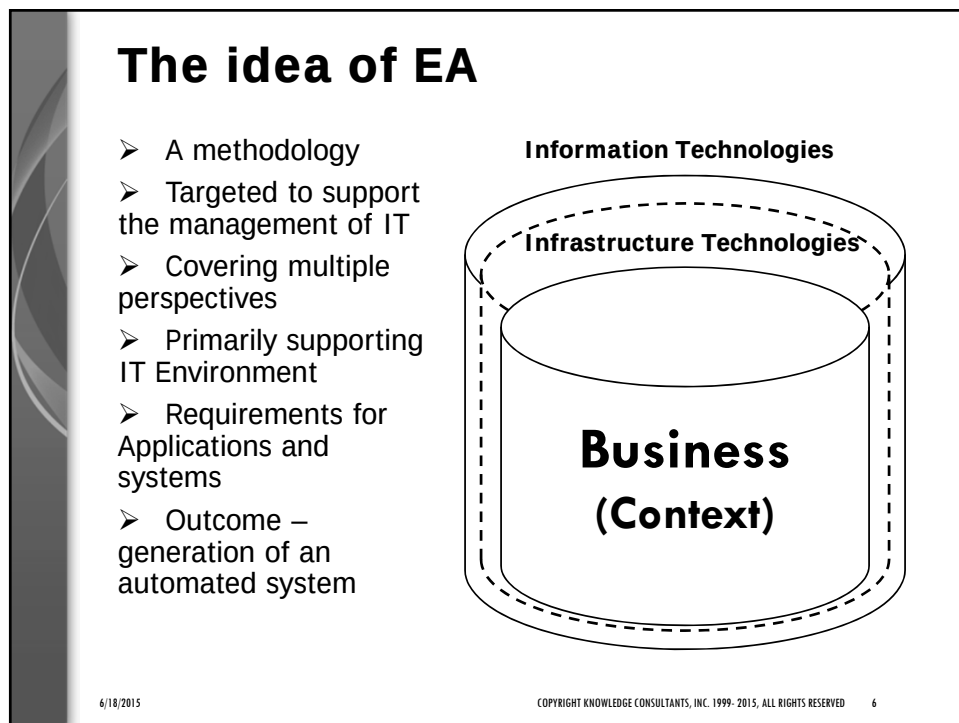

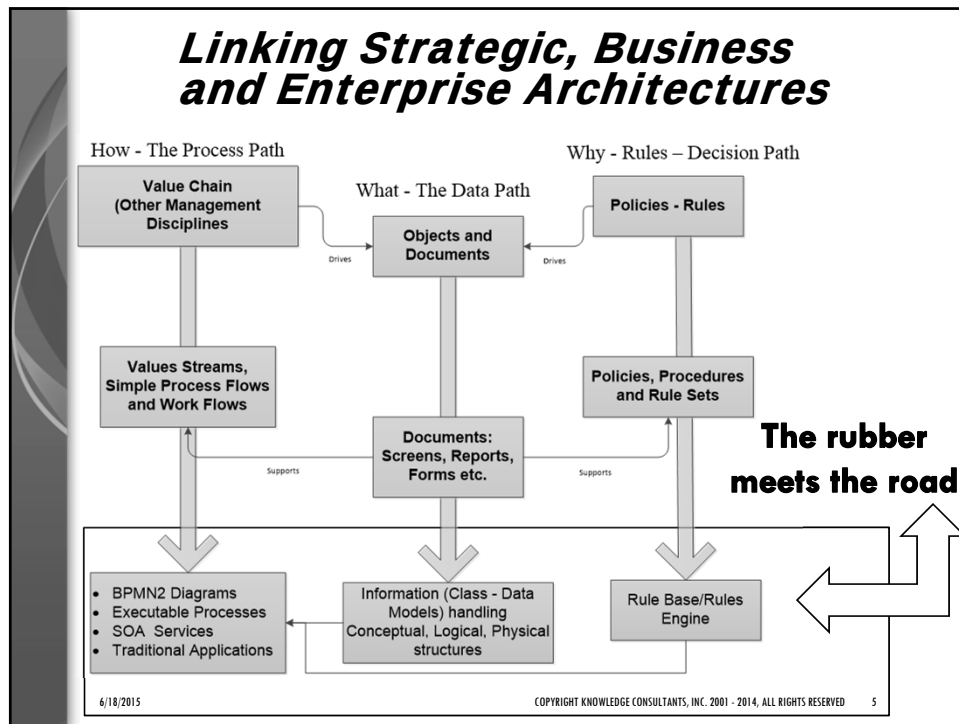

- All the assets needed to execute the what is put in place by the business architecture, the operational vie.

Finally we are here

What makes up EA?

6/18/2015

COPYRIGHT KNOWLEDGE CONSULTANTS, INC. 1999-2015, ALL RIGHTS RESERVED 8

More than an IT focus

Architecture Components	Process	Data/Info	Technology	Applications	Customers
Scope					
Level 0	What part of architecture you want to focus on				
Level 1					
Level 2					
	How detailed and comprehensive you want the effort to be

Enterprise Architecture construction

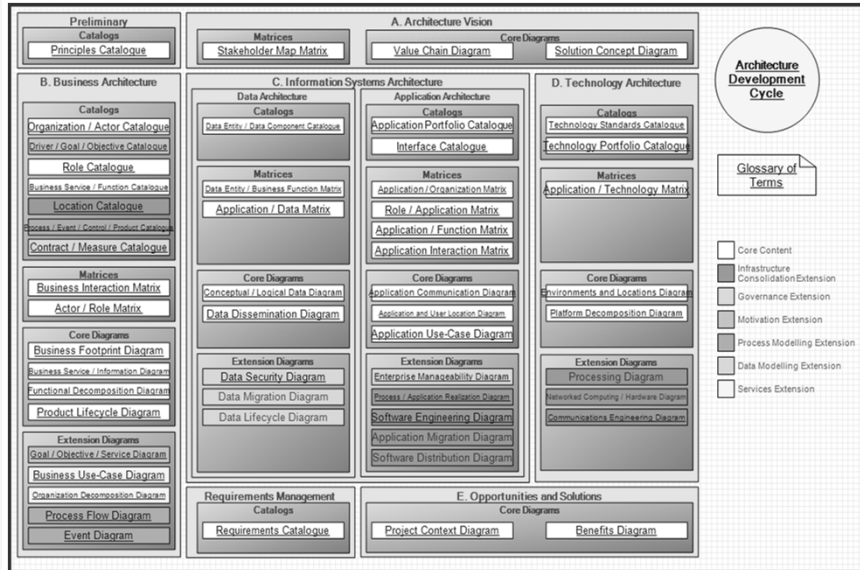

1. Typical sources of input material
 - a. Interviews
 - b. Past efforts
 - c. Reference models
 - d. Other studies (e.g. quality)
2. Typical targets
 - a. Core or foundation models
 - b. Supporting models (matrices, quant models)
3. Typically defined by tools

Here are few examples...

What drives the success of the outputs of EA?

1. Management support and understanding
2. The scope, development model, taxonomy
3. Proof of value through business results
4. Architecture Analytics providing insight into alternatives, impacts, accelerators and barriers
5. The tools and approach used
 - a. Defines the types of artifacts
 - b. Minimally the foundation architectures

Analytical method for EA – how you analyze the outputs

Quantitative analytics

- Simulation
- Alternative scenarios
- Benchmarks

Qualitative analytics

- Comparative
- Ranking
- Impact assessment
- Best fit (e.g. package to analysis)
- Cluster analysis for hidden relationships

Observation and Consensus – the most common

- Architecture team
- Management
- Consultants review

So, what are the issues with architecture today?

Remember who we are serving!

Let's discuss!
