

JRF Membership Focus Study

*Program for improving the services
provided by JRF congregations to
their membership*

Proposal

Implementing a value-driven measurement system for the Jewish Reconstructionist Federation that results in expanding membership, improving relevancy, and increasing revenue potential for its members and JRF.

Deliverables

- **Providing a unified vision for delivering sustainable value for members, congregations, and the entire reconstructionist movement.**
- **Driving innovation to deliver service & products in new and creative ways.**
- **Driving collaboration & community involvement.**
- **Developing a member-first orientation for JRF and its member organizations.**

Challenges

**Escalating
Costs**

**Dwindling
Membership**

**Silos of
Funding
Models**

**How do we
measure
value ?**

The Approach

Provide a way to measure value from the perspective of the customer:

- **The Members**
- **The Organizations**
- **The Local Community**

Enhancing the Membership Model

Providing Members with a way to measure the value they should be receiving from their congregation.

Guiding Congregational Leaders to measure and optimize the value they deliver to Members.

Guiding JRF to deliver optimized value for their organizations and overall membership.

Project Overview

Project Charter

Project Charter			
Developing New Products & Services to drive membership.			
Project Number	JRF - 001	Charter Date	February 1 st , 2010
Project Sponsor	JRF Board of Directors	Project Director	Jeff Walk
Project Scope	<i>Design and implement a customer focus framework for capturing and modeling metrics used to model the outcomes for customers and a set of metrics for which to benchmark the products & services delivered by JRF and its member organizations.</i>		
Objectives	▪ Implement a customer focus methodology ▪ Create a reference model for identifying customer outcomes and metrics for measuring value ▪ Define a complete list of jobs performed by members ▪ Create a repository of customer outcomes & value metrics ▪ Develop a process to prioritize and align the outcomes & metrics with GAPS in products & services		
Timeline	▪ Project Breakdown ▪ 3 weeks of planning ▪ 4-6 weeks of execution ▪ Qualitative study ▪ Quantitative study ▪ 1 week of presentation		

Methodology (Planning)

- Definition
 - Model a Job (reference model)
 - Model the Domain
 - Model the Job Ontology w/in the Domain
- Location
 - Identify the sub-domain to study
 - Select the Job(s) w/in the sub-domain to study
- Preparation
 - Interview SMEs who have or do currently execute the job
 - Draft the Job Reference Model for this instance (particular job)
- Confirmation
 - Review the Domain Model
 - Review the Job Ontology Model
 - Review the Job Reference Model for this instance with SMEs
 - Obtain feedback and iterate the above artifacts

Methodology (Execution)

- Execution (includes iterations of Monitoring & Modification)
 - Qualitative Study (**Phase 1**)
 - Interview designated job executors
 - Capture notes from meetings
 - Capture notes from observations
 - Transform notes into desired outcomes
 - Data Profiling, Cleansing, and Quality
 - Verify Cleansed Listing of Desired Outcomes

Methodology (Execution)

- Execution (includes iterations of Monitoring & Modification)
 - Quantitative Study (**Phase 2**)
 - Prepare a survey
 - Prepare profiling questions
 - Provide script for survey executor to read
 - Prepare separate surveys using the desired outcomes
 - » Targeted to specific job executors
 - » Tailored for limited scope to reduce impacts from fatigue
 - » Capture 2 key metrics for each desired outcome (importance & satisfaction)
 - Identify sample list of survey candidates (job executors)
 - Conduct Survey
 - Ideally, should be 3rd party but must be done with anonymity
 - Must capture profiling information
 - Must be able to conduct survey over phone, electronically or via written response
 - Data Cleansing
 - Data Analysis (per Core Functional Job)

Methodology (Presentation)

- Conclusion
 - Thematic extraction from above analysis
 - Focus only on the patterns impacting desired outcomes w/ highest opportunity
 - Presentation of findings to the steering committee

Program Governance

Staffing Plan

- Steering Committee
 - Jeff Wallk
 - JRF (Marketing) Dan Cedarbaum
 - JRC (Evanston) President
 - JRC (Evanston) Rabbi
 - SH (Northbrook) President
 - SH (Northbrook) Rabbi
 - EHNTJC (Skokie) President
 - EHNTJC (Skokie) Rabbi
- Board of Directors
 - TBD
- Project Team
 - Jeff Wallk
 - Volunteer 1
 - Volunteer 2

Note: Leaders from the congregations can also appoint a designee on their behalf.

Key Milestones & Deliverables

- Qualitative Phase:
 - Job Study for Project Scope
 - Prioritize the jobs to study
 - Develop an interview plan
 - Conduct interviews (capture outcomes)
 - Analyze outcomes & complete analysis
- Quantitative Phase:
 - Draft survey (using outcomes)
 - Conduct survey (measure outcomes)
 - Analyze results & identify opportunities
- Presentation of findings
 - To Steering Committee
 - To JRF Board

Future Deliverables

- Establishing an opportunity pipeline
- Transition ideas to innovation
- Institutionalize the customer focus program
- Develop a growth strategy for JRF & its congregations
- Develop a roadmap of products & services to address the opportunities

A few definitions

What is a Job ?

- The methodology is based on a perspective of measuring the desired outcomes that an individual would like to achieve within the context of a particular "job" that he/she is trying to get done.
- A job is quite simply a definition of what people are actually trying to "get done".

What are Outcomes ?

- Each job is comprised of a common set of activities (steps if you will) which involve planning, preparing, executing, monitoring, adjusting, and completing the work to be done.
- A person trying to complete these steps has a set of desired outcomes they wish to achieve for each step in the job. We call these outcomes and they can be measured.

What is a Job Model ?

- A job model is an attempt to identify the relationships between the core job that a person is performing and all the other jobs that can influence the outcomes for the job:
 - Direct & indirect functional jobs
 - Supply chain jobs
 - Emotional & Spiritual Jobs

All of these can be captured initially & measured eventually (depending on the scope of the study)

The Job Model
