Core Functional Job: Steps & Outcomes (projected)

Job Executor:

Practitioner in a Jewish Religious School

Core Functional Job:

Teach students about Judaism (US, Israel, Global)

Job Steps & Outcomes:

- Step 1: Create lesson plan
 - Outcome: Increase the likelihood that class objectives are clearly stated
 - Outcome: Increase the likelihood that a template exists for building a lesson plan
 - Outcome: Increase the likelihood that success criteria for the class is made available for the practitioner to review
 - Outcome: Reduce the time to draft a lesson plan for a course
 - Outcome: Increase the likelihood that desired outcomes have been captured from the students and families
 - Outcome: Reduce the time to draft the course syllabus
 - Outcome: Increase the likelihood that the book(s) for the course are chosen
 - Outcome: Increase the likelihood that the book(s) for the course are budgeted
 - Outcome: Increase the likelihood that the practitioner is aware of the classroom environment
 - Outcome: Reduce the likelihood that the room layout impacts the execution of the lesson plan
- Step 2a: Ensure Lesson Plan is compliant with School Stds
 - Outcome: Increase the likelihood that Education Director is aligned with the direction of the course

- Outcome: Increase the likelihood that the course is compliant with standards for the school
- Outcome: Increase the likelihood that the course introduces innovative thinking about the subject matter
- Outcome: Increase the likelihood that the course introduces experiences that are relevant to the students
- Outcome: Increase the likelihood that Education staff are aligned with the direction of the course
- Step 2b: Ensure Lesson Plan is compliant with Regulatory Stds
 - Outcome: Increase the likelihood that course is compliant with federal guidelines
 - Outcome: Increase the likelihood that course is compliant with state & local guidelines
 - Outcome: Increase the likelihood that the practitioner has the approved credentials
 - Outcome: Increase the likelihood that the practitioner has the requisite experience to teach the material
- Step 2c: Ensure Lesson Plan is compliant with School Objectives
 - Outcome: Increase the likelihood that the school's desired outcomes have been documented and prioritized
 - Outcome: Increase the likelihood that the course is addresses the school's desired outcomes
 - Outcome: Reduce the likelihood that institutional expectations are not aligned with the success criteria
 - Outcome: Increase the likelihood that clergy are aligned with the direction of the course
 - Outcome: Increase the likelihood that the organizational leadership (Exec & Bod) are aligned with the direction of the course
- Step 3: Gather all materials for the class & students
 - Outcome: Increase the likelihood of being able to find the class materials
 - Outcome: Reduce the likelihood that any class materials are missing

- Outcome: Increase the likelihood that students bring their own books and supplies
- Outcome: Reduce the amount of time to gather the materials for the class
- Step 4: Teach the class
 - Outcome: Increase the likelihood that students learn the material
 - Outcome: Increase the likelihood that students enjoy the class
 - Outcome: Increase the likelihood that students can apply the material
 - Outcome: Increase the likelihood that students demonstrate respect (i.e. for themselves, for their peers in class, for the teacher, for other people)
 - Outcome: Increase the likelihood that students embrace Tikkun Olam
 - Outcome: Increase the likelihood that students embrace demonstrate mensch-like behavior
 - Outcome: Increase the likelihood that students interact in the class
 - Outcome: Increase the likelihood that students are encouraged to ask questions
 - Outcome: Increase the likelihood that other students in the school would like to take the class
 - Outcome: Increase the likelihood that students understand the importance of learning the material (i.e. Judaism)
 - Outcome: Increase the likelihood that students appreciate different points of view regarding the material (i.e. US, Israel, Global)
 - Outcome: Increase the likelihood that students are able to leverage knowledge about the class in other studies
 - Outcome: Increase the likelihood that students are able to leverage knowledge about the class in other areas of their lives

- Outcome: Increase the likelihood that students are able to conduct portions of the class on their own (i.e. reverse model of sorts)
- Step 5: Monitor the students and capture feedback
 - Outcome: Increase the likelihood that the practitioner is able to detect when students become disconnected (i.e. bored, confused, or disinterested)
 - Outcome: Increase the likelihood that the practitioner is able to address questions from the students
 - Outcome: Increase the likelihood that the practitioner is able to make adjustments to the class materials to address student feedback
 - Outcome: Increase the likelihood that the practitioner is able to address problems in the class (disruptions, malaise, confusion via body language)
 - Outcome: Increase the likelihood that the practitioner is able to address questions from the students
 - Outcome: Increase the likelihood that the practitioner is able to document student feedback
- Step 6a: Adjust the material to address student feedback
 - Outcome: Increase the likelihood that the practitioner is able to address questions from the students
 - Outcome: Increase the likelihood that the practitioner is able to make adjustments to the class materials to address student feedback
 - Outcome: Increase the likelihood that the practitioner is able to address problems in the class (disruptions, malaise, confusion via body language)
 - Outcome: Increase the likelihood that the practitioner is able to address questions from the students
 - Outcome: Increase the likelihood that the practitioner is able to document student feedback
- Step 6b: Note lessons learned

- Outcome: Increase the likelihood that the practitioner is able to identify areas for improving class material (by leveraging student feedback or using observational analysis)
- Step 7: Ensure the students learned the lesson
 - Outcome: Increase the likelihood that the practitioner is able to assess knowledge retention by the students
 - Outcome: Increase the likelihood that the practitioner is able to document individual student progress with class material
 - Outcome: Increase the likelihood that the practitioner is able to document collective student progress with class material
 - Outcome: Increase the likelihood that the practitioner is able to document individual student progress with individual development (i.e. mensch-like behavior, mitzvoth, respect for self & others)
- Step 8: Assign homework for students to reinforce lesson
 - Outcome: Increase the likelihood that the students will do assigned homework
 - Outcome: Increase the likelihood that the students will understand the assignment
 - Outcome: Increase the likelihood that the homework is meaningful to the students
 - Outcome: Reduce the amount of impact the homework will have on student's other priorities (i.e. public school work, social time, family activities)
 - Outcome: Increase the likelihood that the practitioner will be able to assess student comprehension when reviewing homework
 - Outcome: Increase the likelihood that the practitioner will be able to take corrective action to assist students with knowledge retention
 - Outcome: Increase the likelihood that the practitioner will be able to take corrective action to adjust course material

- Outcome: Increase the likelihood that the practitioner will be able to take corrective action to adjust the homework assigned
- Step 9: Conclude lesson
 - Outcome: Increase the likelihood that the practitioner will be able to conclude the class on time
 - Outcome: Increase the likelihood that the practitioner will be able to communicate offline responsibilities to the student
 - Outcome: Increase the likelihood that the practitioner will be able to communicate offline responsibilities to the student's family
 - Outcome: Increase the likelihood that the practitioner will be able to spend time with students to address their questions
 - Outcome: Increase the likelihood that the practitioner will be able to spend time with the student's family to address their questions (e.g. limited to a few families)
 - Outcome: Increase the likelihood that the practitioner will be able to provide Education Director with updates
- Step 10a: Cleanup classroom and return materials to storage
 - Outcome: Increase the likelihood that the practitioner will be able to return all of the class materials to storage without damaging them
 - Outcome: Reduce the amount of time to return class materials to storage
 - Outcome: Reduce the amount of time to return the classroom to its original state
 - Outcome: Increase the likelihood that the storage location for class materials is accessible
 - Outcome: Reduce the likelihood that food is left behind in the classroom
 - Outcome: Reduce the likelihood that student's belongings are left behind in the classroom

- Outcome: Reduce the likelihood that communications to the student's family are left behind in the classroom
- Step 10b: Update Lesson Plan with lessons learned
 - Outcome: Increase the likelihood that student's feedback is used to improve the lesson plan
 - Outcome: Increase the likelihood that family feedback is used to improve the lesson plan
 - Outcome: Increase the likelihood that institution's feedback is used to improve the lesson plan (i.e. teachers, peers, room parents)
