

Shir Hadash Ideation Session

*Inspiring Meaningful and
Contemporary Jewish Living*

Agenda

Activity	Resources	Effort
Define the Objective	Ed Committee	30 min
Initial Idea Dump	Students	30 min
Concept Fan + More Ideas	Teachers (ideally)	30 min
Random Entry 1 (Out of the Box Ideas)	Parents/Members	30 min
Random Entry 2 (Out of the Box Ideas)	Parents/Members	30 min
Harvesting (Categorization & Prioritization)	Ed Committee	60 min
Idea Selection (Top 3 Ideas – Voting for 1)	Ed Committee	30 min
Total Time		4 hours

Objective Statement

“Develop a Shabbat program to build an all-inclusive, all-embracing Shir Hadash community where members of all ages and all levels want to be a part.”

This program will include:

- *Jewish Culture and Traditions (Dance, Music & Food)*
- *Jewish History and of course*
- *Jewish Education*

Idea Dump

30 min

A few definitions

- Definition: **Idea**
 - A general approach to doing something • A general direction • High level, view from above • Is not “actionable”
- Examples:
 - Create a new platform - **NO**
 - Create a diagnostics platform to launch new products and services - **YES**

The Concept Fan

Organizing our Ideas

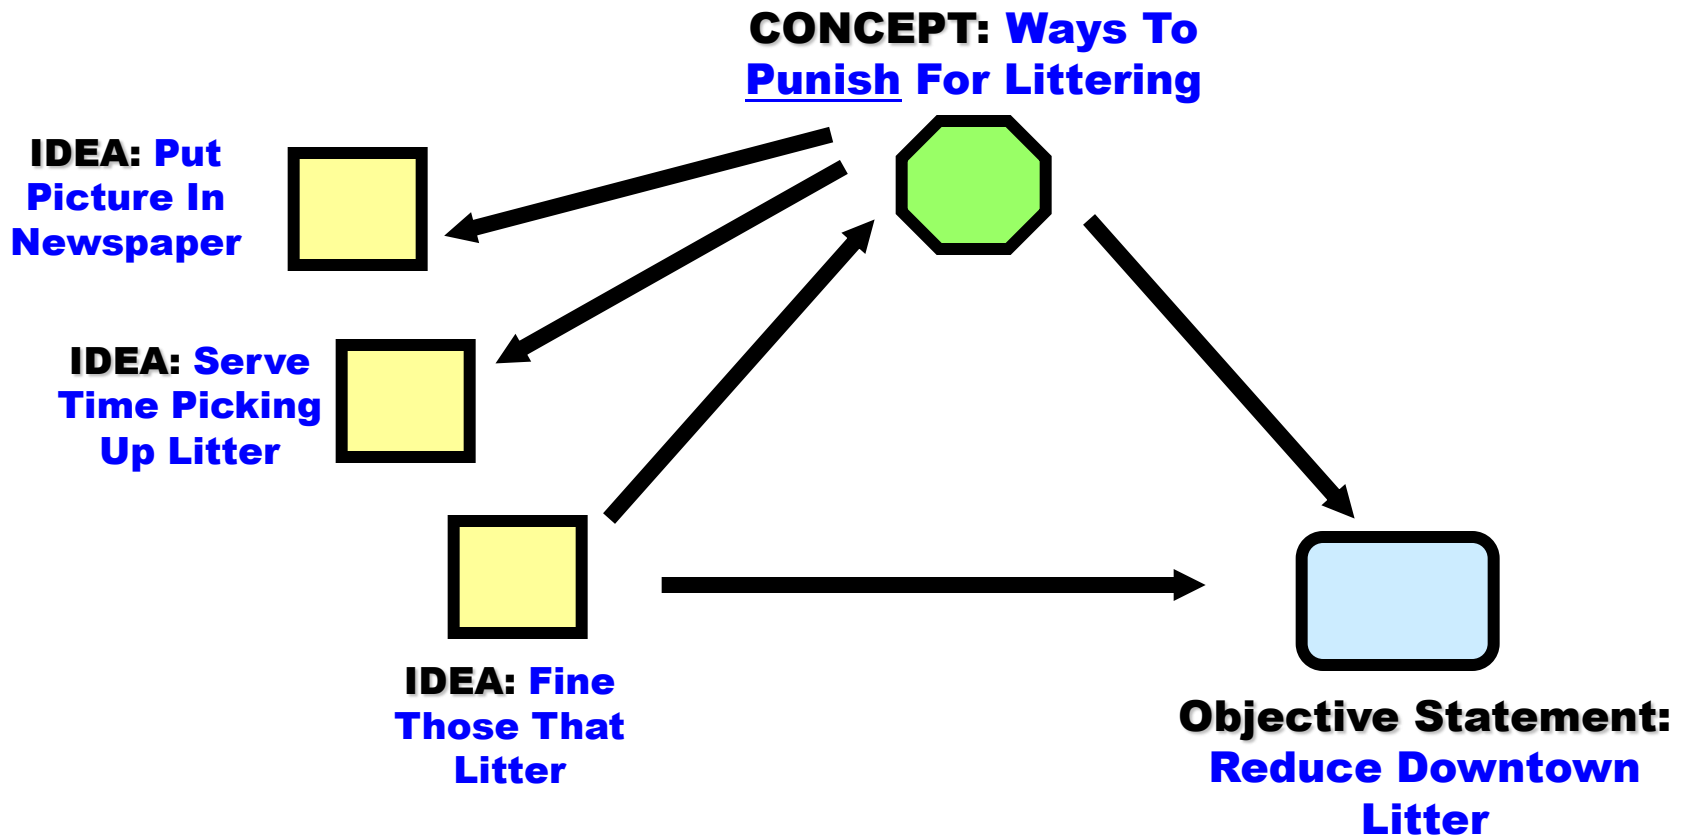

30 min

Introducing the Concept Fan

1. *What is the concept behind the idea?*

2. *Are there any other ways to carry out that concept?*

3. *Are there any other concepts?*

Introducing the Concept Fan

OBJECTIVE:

Generate ideas on how to make sticky notes more popular

This offer seems a little fishy if you ask me!

Ways to more easily transport sticky notes after writing

Ways to make it easier for sender to clearly indicate something

Ways to have sticky notes indicate something in a unique and fun way

Ways to provide more flexibility to the user

Ways to use shapes to indicate something or enhance the message

Ways to better organize the sticky notes after they are written

Ways to use texture to indicate something or enhance the message

Emboss an image to match the fragrance on the note

Create a small book with clear plastic pages to store notes for travel

Print a blank smiley face on the note so sender can indicate an emotion

Add scents & colors to help get message across - scratch & sniff!!!

A few definitions

- Definition: **Idea**
 - A general approach to doing something • A general direction • High level, view from above • Is not “actionable”
- Examples:
 - Create a new platform - **NO**
 - Create a diagnostics platform to launch new products and services - **YES**

A few definitions

- Definition: **Concept**
 - A specific way of doing something
 - Low level of detail • Specific • Is “actionable
- Examples:
 - Ways to minimize the likelihood of mistakes
 - Ways to reduce the cost of a product

Ideation (Round 1): (15 min)

- Review the focus statement
- Review our concept fans
- Divide the concepts amongst the team
- Generate ideas for each concept

Ideation (Round 2): (15 min)

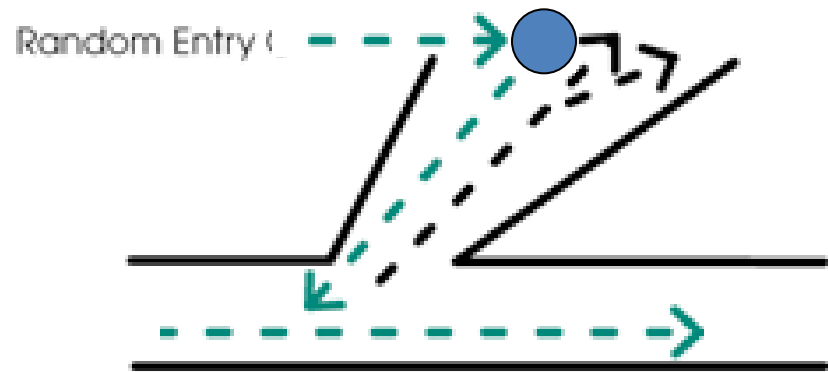

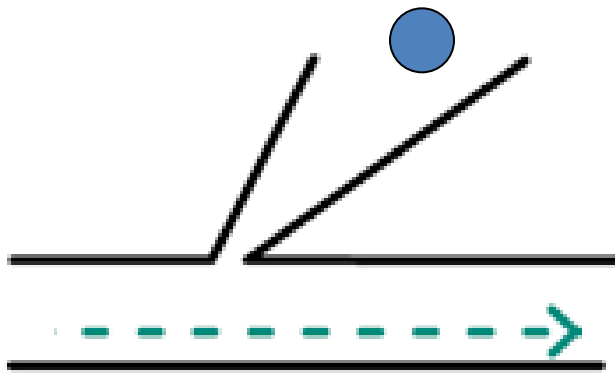

- Divide the concepts amongst the team
- Generate ideas for each concept

Random Entry (1 & 2)

Generate More Ideas

30 min (each)

Explanation of Random Entry

Random Entry: Overview

1. Select a focus.
2. Obtain a random word or object.
3. Think about the **attributes** or **characteristics** of the word or object not the word or object itself.
4. What ideas from the random entry can be applied to the focus?

Real Life Example: New Business

Product innovation inspired by
random entry thinking about how
qualities of
“oak barrels” might apply
to hunting blinds.

The POT-BELLY BLIND™
“More Room In the Middle”

More Durable: Heavy duty fiberglass panels have a weatherproof gel coat exterior.

More Portable: Blind can be broken down to fit into any standard size pickup truck.

More Options: Blind can be placed on a stand or simply used as a ground blind.

Patent Pending

A QUICK-PANEL™ PRODUCT BY G & G MANUFACTURING

Random Entry (5 min x 6 sets)

- I will provide random words and random objects
- For each, try to generate ideas for 5 minutes related to our overall objective or any of the concepts
- **Things To Avoid**
 - Don't wait for the perfect word or object.
 - Don't list all the attributes of the word first.
 - Don't make too many jumps
 - No need to explain how you got the idea

Harvesting

60 min

Categorize Ideas (45 min)

- For each idea, you need to **estimate** how long it will take to implement the idea. We're looking to slot each idea into 1 of the following 3 buckets by placing a letter S, M, or L into the column next to the idea:
 - **S = Short Term ideas** (1-2 weeks)
 - These are ones you can assign to folks now
 - **M = Mid Term ideas** (3-24 weeks)
 - These need a bit more planning. Typically grouping one or more into a project
 - **L = Long Term ideas** (> 24 weeks)
 - Requires more formal analysis, planning and funding and might require several iterations to complete

Harvesting (Overview)

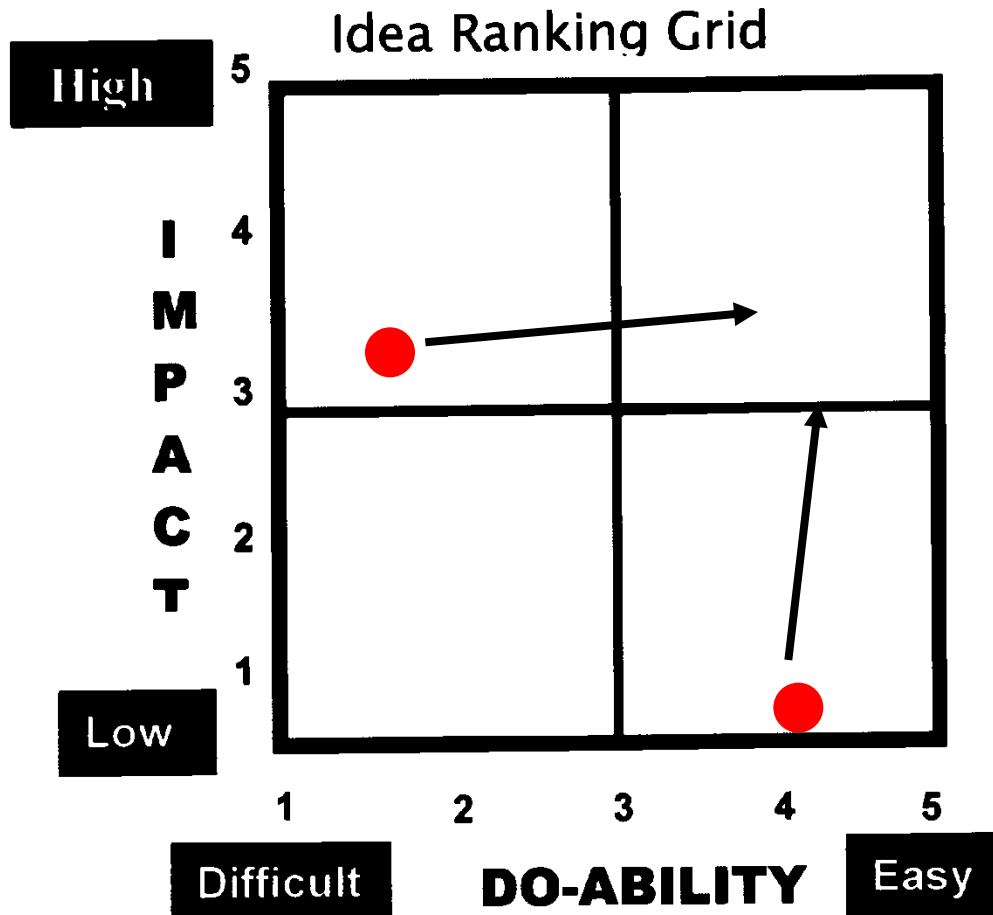

- For each idea, we need to evaluate it along 2 dimensions:

1. Impact on the objective

- Is this a game changer ?
- What portion of our goal can we achieve ?

2. Do-Ability (how easy this is to accomplish ?)

- Right information (does this require upfront analysis ?)
- Right resources (human, technical)
- Right scope (are there other areas that are impacted ?)
- Right funding (lots or a little ?)

DO-ABILITY
Feasibility
Time
\$ Cost
Resources
Political Acceptability
Etc.

Harvest Ideas (Part 1): (30 min)

- **Objective: “To design, pilot and implement a sustainable rapid development process that is best in class and evolves with Hospira R&D”**
- For each idea, you need to write the letter (rating) following in the columns provided next to each idea:
 - **Impact:** (H – high, L - low)
 - **Do-Ability:** (H – easy, M - medium, L - hard)

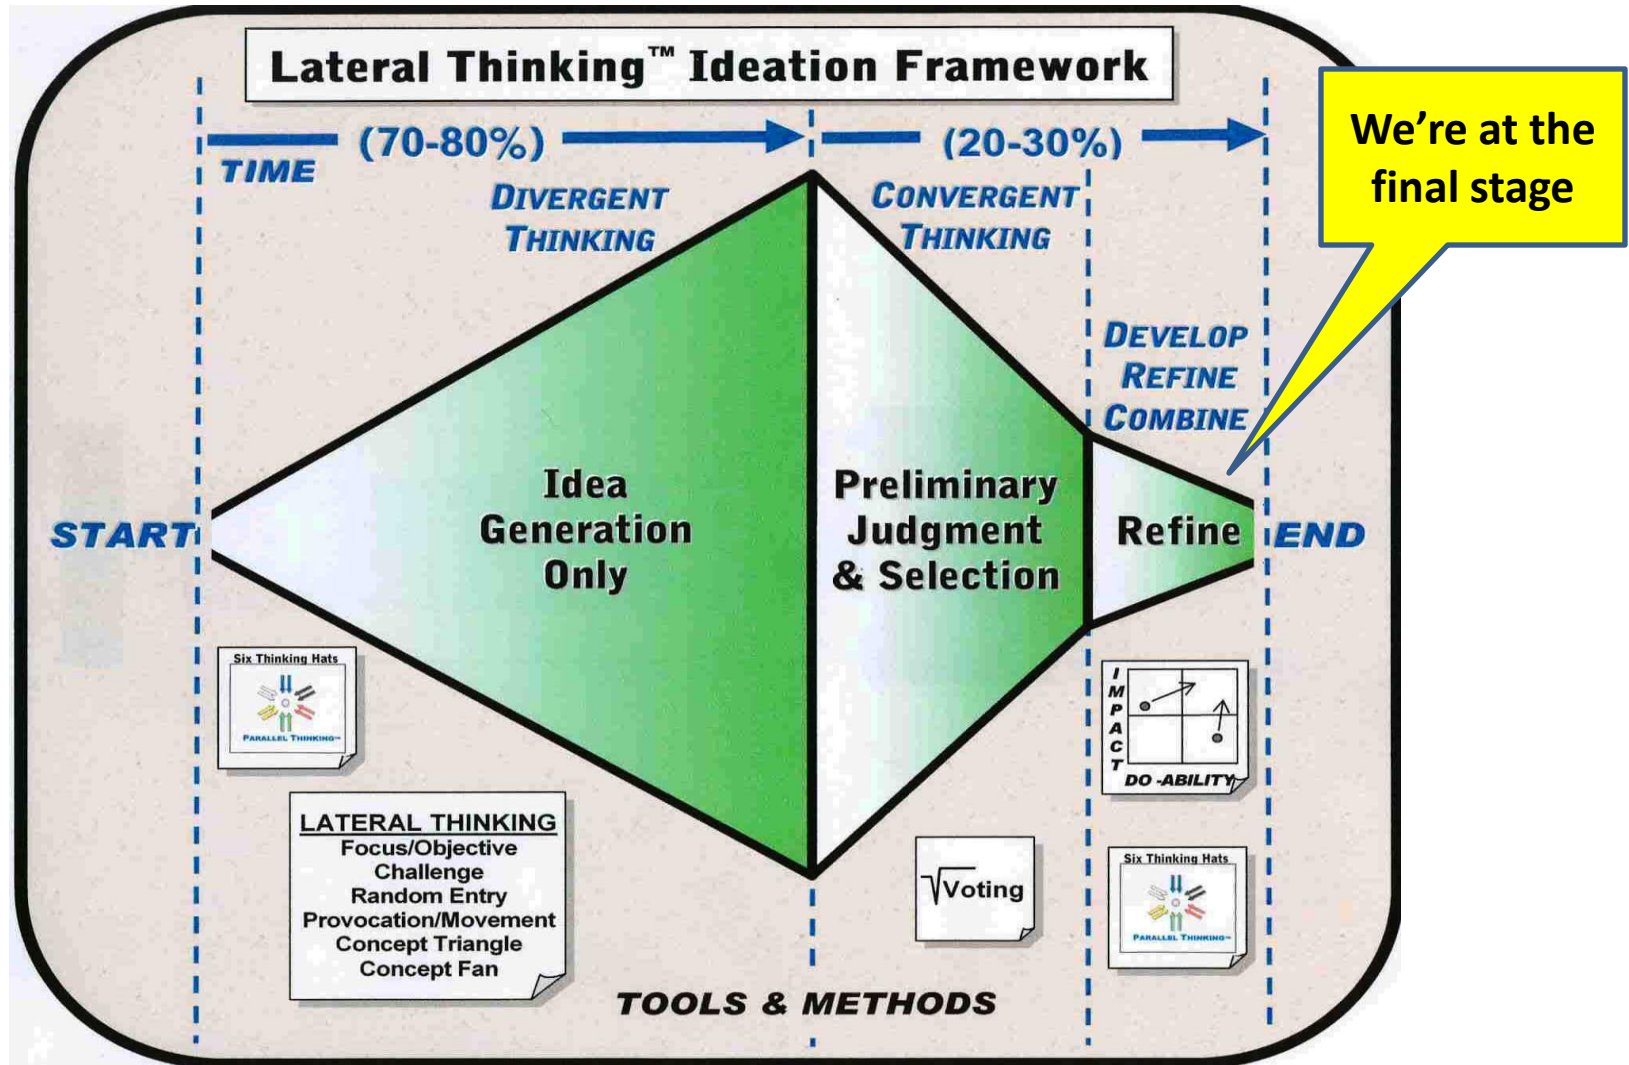

Harvest Ideas (Part 2): (30 min)

- Next, you need to look for ideas that can address multiple concepts. These are typically some of the best ideas as they satisfy several areas of opportunity.
- For each idea, you need to write the **concept number(s)** in the column provided next to each idea:

Idea Selection

30 min

Lateral Thinking Overview

Selecting the Best Idea(s)

- Identify the Boldest ideas within each approach by using the following 2 dimensions:

1. Impact on the objective

- Is this a game changer ?
- What portion of our goal can we influence ?

2. Do-Ability (how easy this is to accomplish ?)

- Time & Cost to implement
- Acceptance of greater risk

Thank You
for
Your Ideas !
