

A “Stimulus Plan” for JVS

Proposal

Develop a consulting model to augment JVS's employment network (JEN) as a low-cost service provider for businesses as part of a socio-economic "stimulus" plan to:

- *Deliver value for local businesses and community organizations,*
- *Provide revenue for unemployed resources,*
- *Generate opportunities for unemployed resources to acquire new skills, which can be applied to permanent positions.*

Current Challenges

- Community Challenges:
 - Unemployment remains high
 - Many jobs may never return once the economy recovers
 - Taxes are rising along with service cuts to communities
 - Small business owners are struggling to survive
 - More highly skilled workers and executives are unemployed than ever
 - Many states, cities, and communities are under water with debt and they are struggling to fund entitlement programs and support families who are in need.

“The private sector of the economy that was supposed to thrive under the Bush administration ended up with a net loss of 223,000 jobs since August 1999, according to the latest figures from the Bureau of Labor Statistics. Meanwhile, the nation's population has grown by 33.5 million people.

That's the worst job-creating performance by the private sector since, you guessed it, the Great Depression”

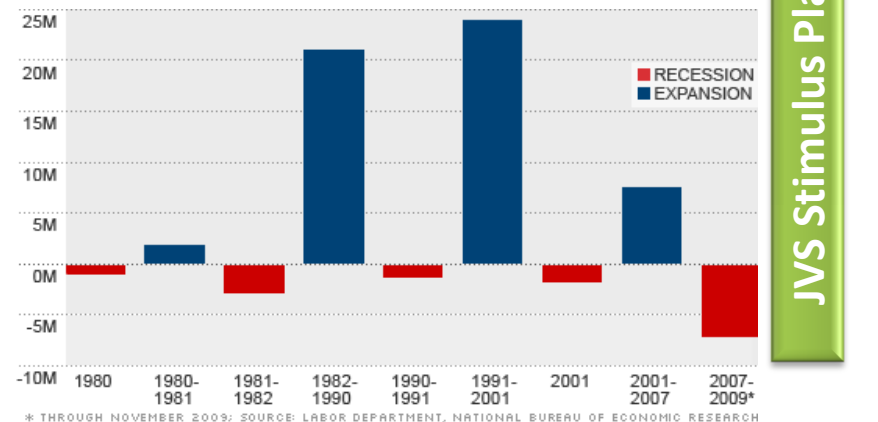

- Russ Britt, LA bureau chief MarketWatch

Current Challenges

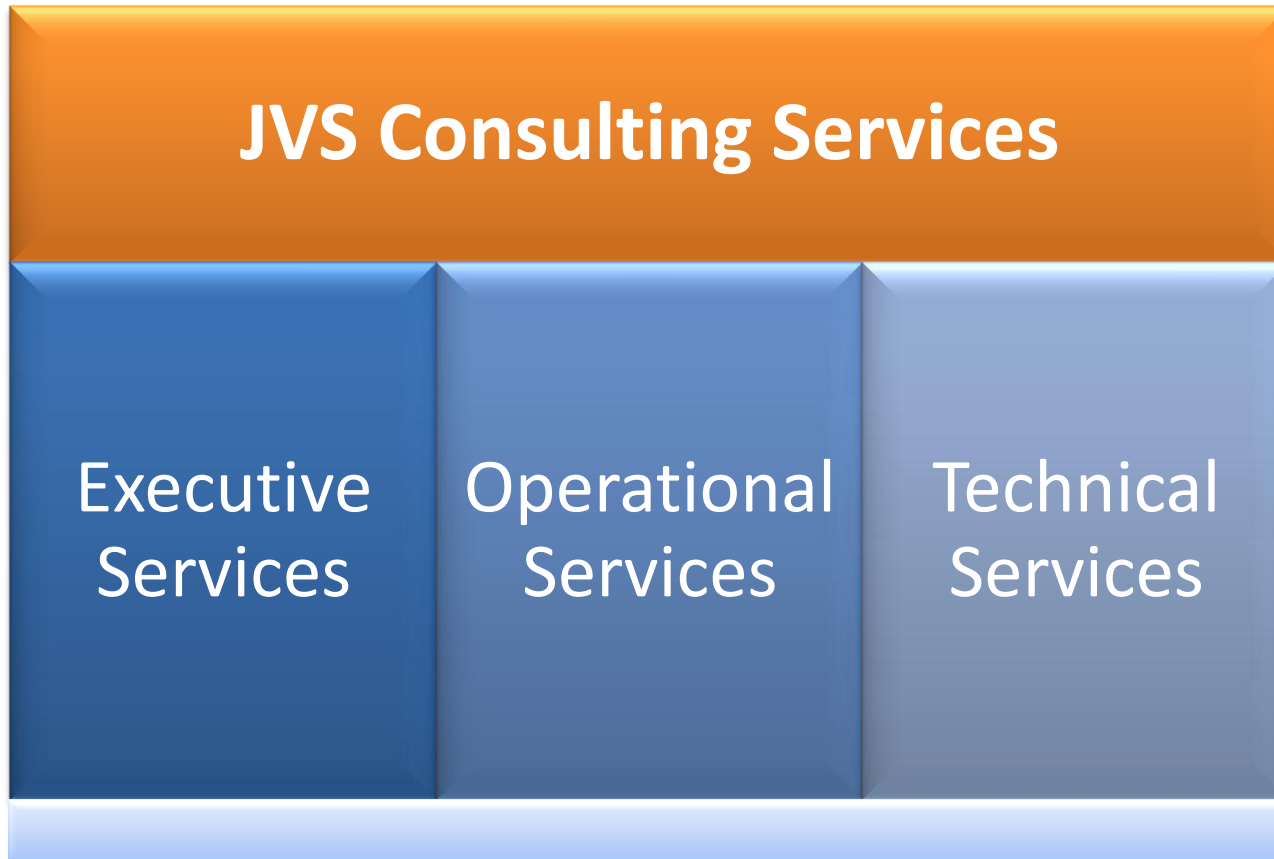

- JVS's Challenges
 - Funding has been cut
 - They have limited resources to assist communities
 - Employers don't necessarily look to JVS as a source for highly skilled workers
 - Due to funding issues, it's difficult for JVS to launch new programs for unemployed workers

Solution

- Develop a consulting services model using a phased approach to layer in higher value services over time:
 - Phase 1 (Technical Services)
 - Phase 2 (Operational Services)
 - Phase 3 (Executive Services)

Introducing a 3-Track Consulting Model

Solution Services Tracks

- Technical Services
 - Architecture Planning
 - Portfolio Planning
 - Project Management
 - Requirements Management
 - Service Architecture
 - SOA Design
 - Data Architecture
 - Business Intelligence
 - Process Modeling
 - SaaS & Cloud Computing
- Technical Services (cont.)
 - Network Management
 - Telecom& VOIP Planning
 - Desktop Management
 - Security Management
 - Business Analysis
 - Portal Design
 - Document Management
 - Collaboration Services
 - Social Networking

Solution Services Tracks

- Operational Services
 - Six Sigma, Lean & Kaizen
 - Supply Chain Management
 - Resource Management
 - Scheduling & Optimization
 - Forecasting & Planning
 - Budgeting & Planning
 - Project Management
 - Measurement & Reporting
 - Process Re-engineering
 - Business Process Mgmt
- Executive Services
 - Establishing vision
 - Guiding strategy
 - Investment Planning
 - Portfolio Management
 - Communications
 - Market Research
 - Marketing & Sales
 - Product Development
 - Guiding Innovation

Startup & Launch

- Leverage JVS's Jewish Employment Network (JEN) to build a consulting services practice:
 - Leverage a highly skilled workforce that is currently unemployed
 - Build credibility and deliver value to businesses in the local community
 - Provide revenue for unemployed workers who can gain new skills and potentially land positions in other organizations
 - Generate a small revenue stream to fund the program (initially) and develop/expand other programs (eventually)

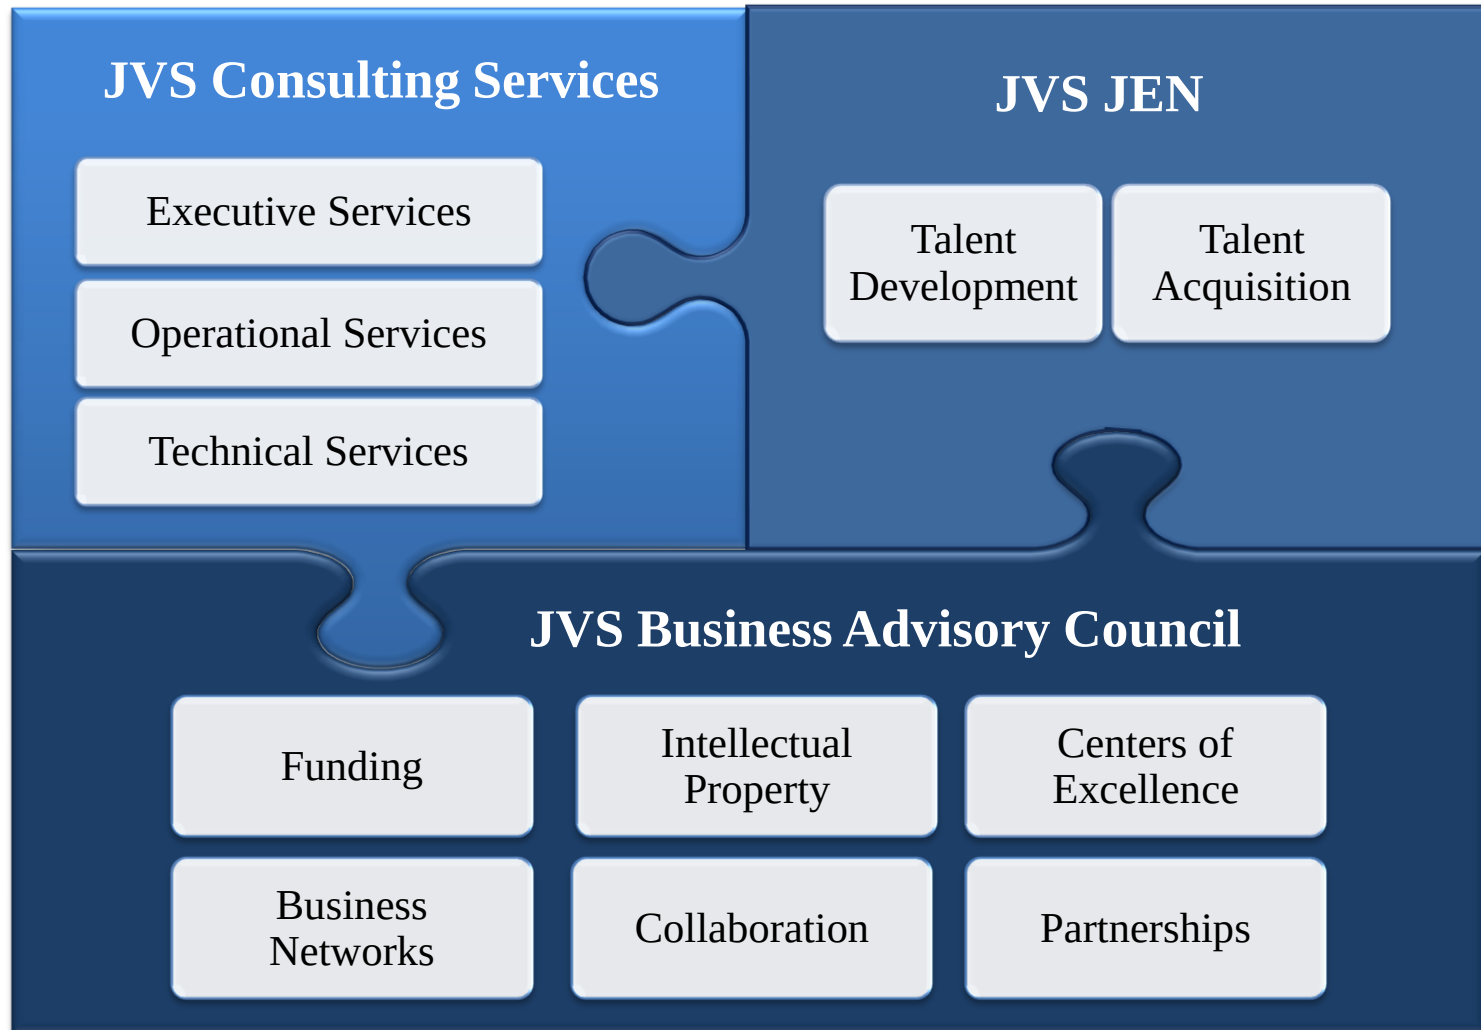

Positioning & Pricing

- Initial service offerings will be delivering technical advisory and delivery services for companies at a price discount to gain market penetration.
- Over time, prices can be increased as value is optimized and credibility established.
- As new services are launched and higher value services are offered, pricing and margins will increase.
- JVS will realize a portion of the revenue to support ongoing operations and the rest is provided to the resources who offer services for engagements.

Benefits

- Create revenue for unemployed resources.
- Provide resources with contract to hire opportunities.
- Develop new skills for resources to position them for new opportunities .
- Position JVS as a center for opportunity (investment) and innovation (value delivery).
- Generate tax & income revenue to boost local economies.
- Create a “pull” model for JVS’s services & JEN’s resources
- Build a more integrated model for JVS (see next slide).

A Collaborative Business Model for JVS

JVS's Opportunities

- Provide an independent & sustainable funding model.
- Provide a pull model for JVS to create opportunities for unemployed workers of all levels.
- Offer valuable experience & relevant skills in driving growth and innovation.
- Build a service model that can provide revenue for JVS as well as the talent pool available to JVS.
- Provide opportunities for small businesses.
- Expand the business model to deliver value not just resources to the market.

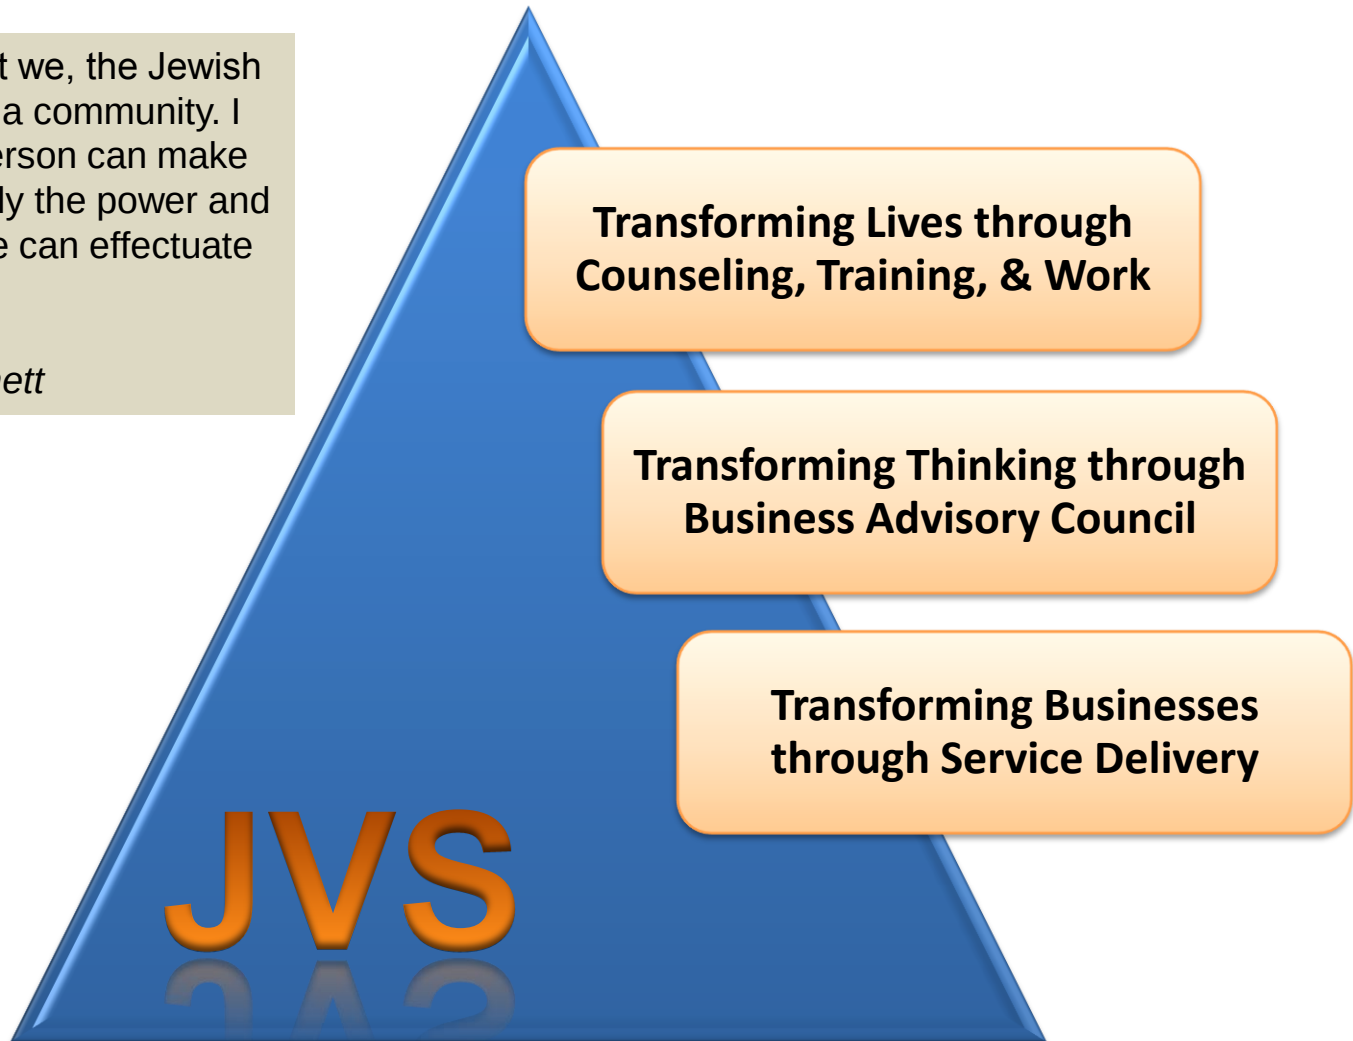

JVS's Opportunities

- Develop a revenue stream to underwrite existing programs and services.
- Reduce dependency on 3rd party funding.
- Increase relevancy amongst businesses and communities by offering tangible value.
- Extend the value proposition to adjacent business and municipalities.
- Create an value-driven model that can be extended throughout the US.

A Socio-Economic Business Model

“We are taught that we, the Jewish people function as a community. I believe that one person can make a difference but only the power and will of the collective can effectuate great change.”

- Harvey Barnett

6-Month Action Plan

Establishing Framework

- Establish a Board of Directors
- Establish Management Team & staff up the lead positions
- Build out the business model & draft plans for each area
- Begin work on the marketing plans & network with partners

Building the Portfolio

- Secure investors & funding to support resources during ramp up
- Establish the pipeline of companies using JVS's relationships
- Launch a few small engagements and establish credibility
- Continue growing the portfolio & improving the delivery model

Filling the Pipeline

- Ramp up the number of resources (leveraging JVS JEN)
- Incorporate best practices models for all 3 delivery models
- Formalize the marketing & sales
- Begin work on branding and establish a website

Delivering Value

- Begin measurement and reporting to drive improvement
- Continue expanding the opportunity pipeline
- Mature the delivery models for Executive, Operational, & Tech
- Capture case studies and references from clients
