

---

The next two meetings will tackle in sequence the following topics:

- (1) Requirements package review
- (2) Product package finalization
- (3) Strategy package update / finalization
- (4) Capability package update / finalization

Please note that we have finalized the remaining changes for Policy Package. Many thanks to Derek for his contributions. Bill & Jim provided some important guidance on Product (see Bill's notes regarding PRODBok's guidance on Product's treatment for Services).

Per Jim, there are a number of significant changes to Strategy based on last week's discussions as we briefly touched on Strategy after completing Policy. The latest instance is much simplified - work in progress.

The latest updates for the Packages can be found on the Guild's EA Cloud instance.

our next meeting is scheduled for Wed at 11:00 AM (CST).

Jeff
