

Leadership Program

Blueprint & Roadmap

Jeff Wallk
Director of Product & Services

***“Advocacy Body for...
The Public, The Practice, The Profession”***

Sponsor Guidance

- Define & Build an EA Leadership program that can be launched in fall of 2010 (assume Sept.).
- Start with Baseline Program Content and align with available research (assume 1-2 months of iteration)
- Establish a steering committee for the program (not just the development of the program)
- Assume initial launch is a version 1 iteration subject to continuous improvement based on feedback & new findings per CAEAP marketing efforts (TBD)
- Source financing, partners, educators, and staffing to bootstrap the program
- Define ongoing model to sustain the program

Program Overview

- LEAP is the answer to a critical need in the marketplace and fills a career path gap for aspiring Chief Enterprise Architects. LEAP is professional development program targeted at senior level experts and newer Enterprise Architects who need to develop the skills required by Chief Enterprise Architects and senior Enterprise Architects responsible for leading large Enterprise Architecture transformation efforts.
- This is a unique professional development program that consists of multiple sessions where members of the program will be exposed to leaders in the Enterprise Architecture community. In addition, the program will consist of books, articles, and other resources that will be delivered to the participant as part of the program costs. LEAP is a complementary program to other Enterprise Architecture training and certification programs found in the industry.

Program Overview

- Backed by the power, research, resources, and knowledge of CAEAP, you will learn best practices and collaborative models that will lead you to a template for success. Discussions revolve around where to invest resources, where to realign organizational goals and processes, and what policies and procedures will support core missions or business functions. This program provides a unique platform for individuals all business functions to come together in a collaborative process to ensure that strategy and investments are aligned for flexible, agile enterprise architecture.

LEAP Market Snapshot

Market Segments:

EAs and leaders in organizations
from sr. mgrs to c-Level

Demographic(s)	Job(s)
Strategic Leaders	Planning & prioritizing investments Allocating resources Setting & communicating strategy Identifying market opportunities Portfolio (investment) management
Operational Leaders	Production planning & forecasting Design & build new products/services Deliver products & services to customers
Functional Leaders	Provide support service to the Strategic & Operational leaders
EA Practitioners	Develop blueprints & roadmaps Optimize reuse of technology Reduce complexity Define business, operational, & technical models and structures

Who should attend ?

- This program is for CIOs, COOs, chief information architects, enterprise architects, directors and VPs of information management, business strategists, and other professionals who looking to move to their career to the next level.
- In addition, LEAP is especially useful for individuals interested in becoming a Chief Enterprise Architect (individuals who manage an entire Enterprise Architecture effort with key architectural responsibilities), senior management who are responsible for an Enterprise Architecture practice within an organization and individual practitioners who manage their own professional practice. LEAP is an executive level professional development program and not a functional based certificate program.

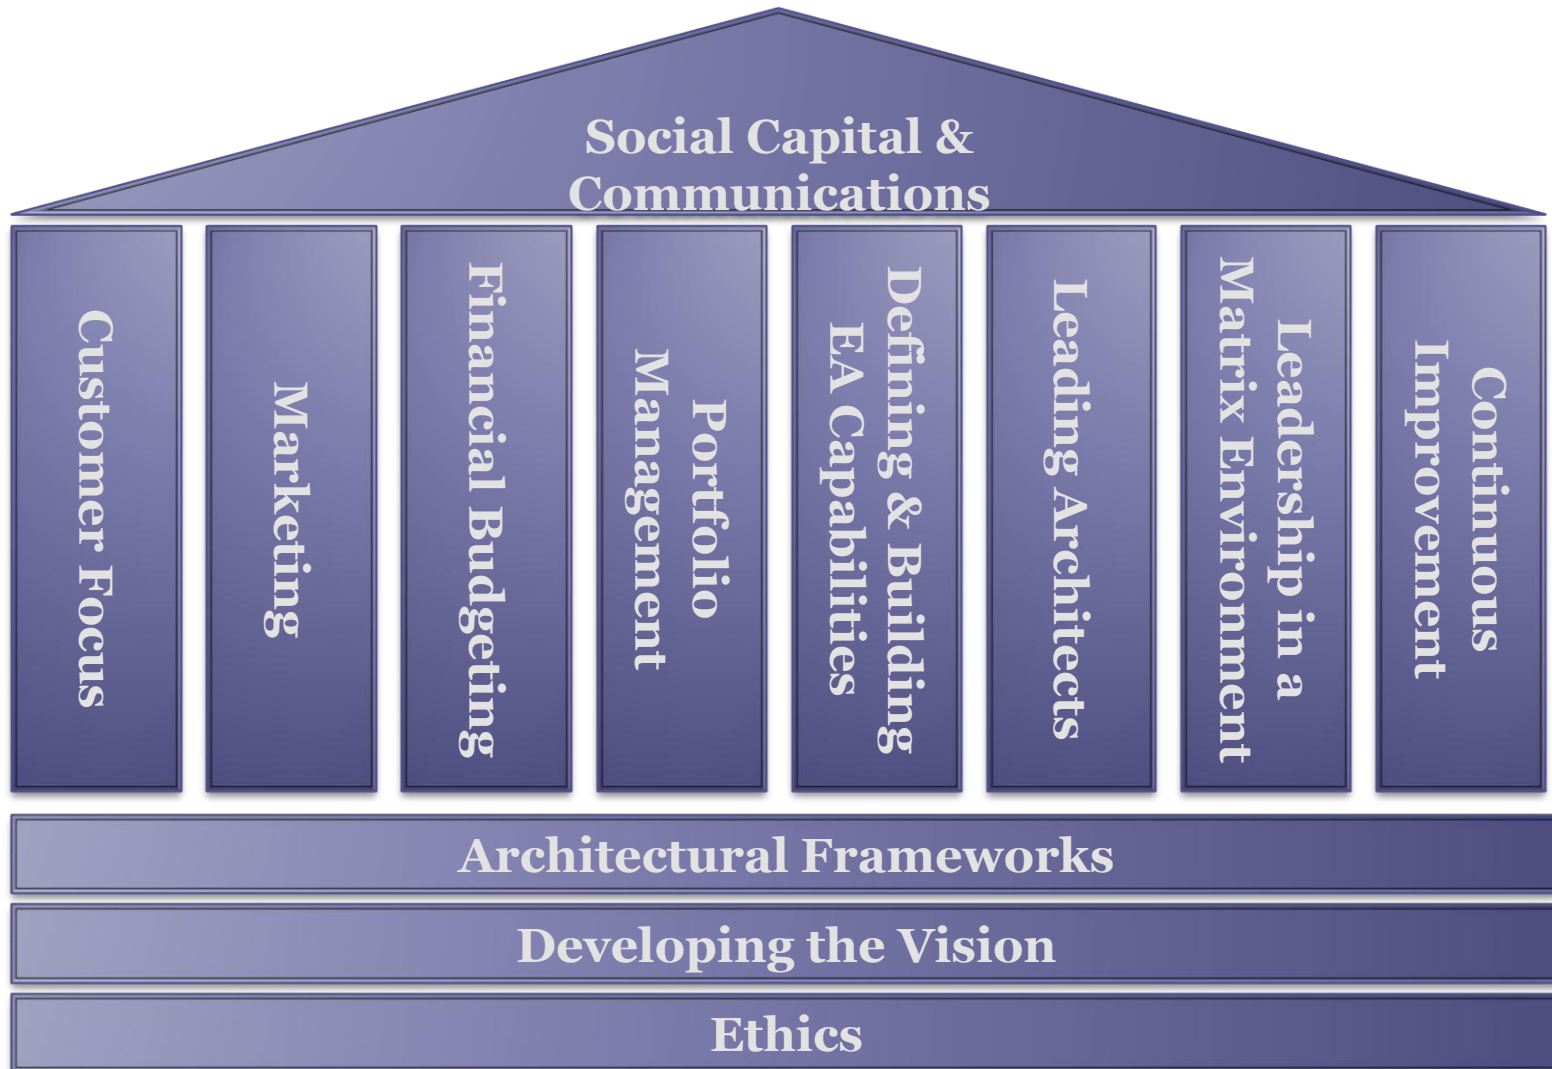

- The application of Enterprise Architecture is driven by competent and reliable professionals who can demonstrate not only the necessary competences but as well advanced knowledge, integrity, accountability, and public obligation. To that end, LEAP covers topics that mature the individual so that he/she can interact and operate within all aspects of an organization as a successful Chief Enterprise Architect. Critical topics to this function include vendor negotiation, ethics, budgets, presentation skills, architectural planning, how to build and develop Enterprise Architecture within an organization, envisioning and alignment, managing other Architects, and other topics that pertain to the non-functional skills required of the Chief Enterprise Architect today.

Benefits

- Join this program if you aspire to:
 - **Grow an Enterprise Architecture function within an organization**
 - **Attain a better grasp on how to handle Enterprise Architecture challenges at the executive level**
 - **Increase competitive position in being hired as a professional Chief Enterprise Architect**
 - **Presenting a career milestone to management that you are ready for more responsibility**

Positioning LEAP w/in CAEAP

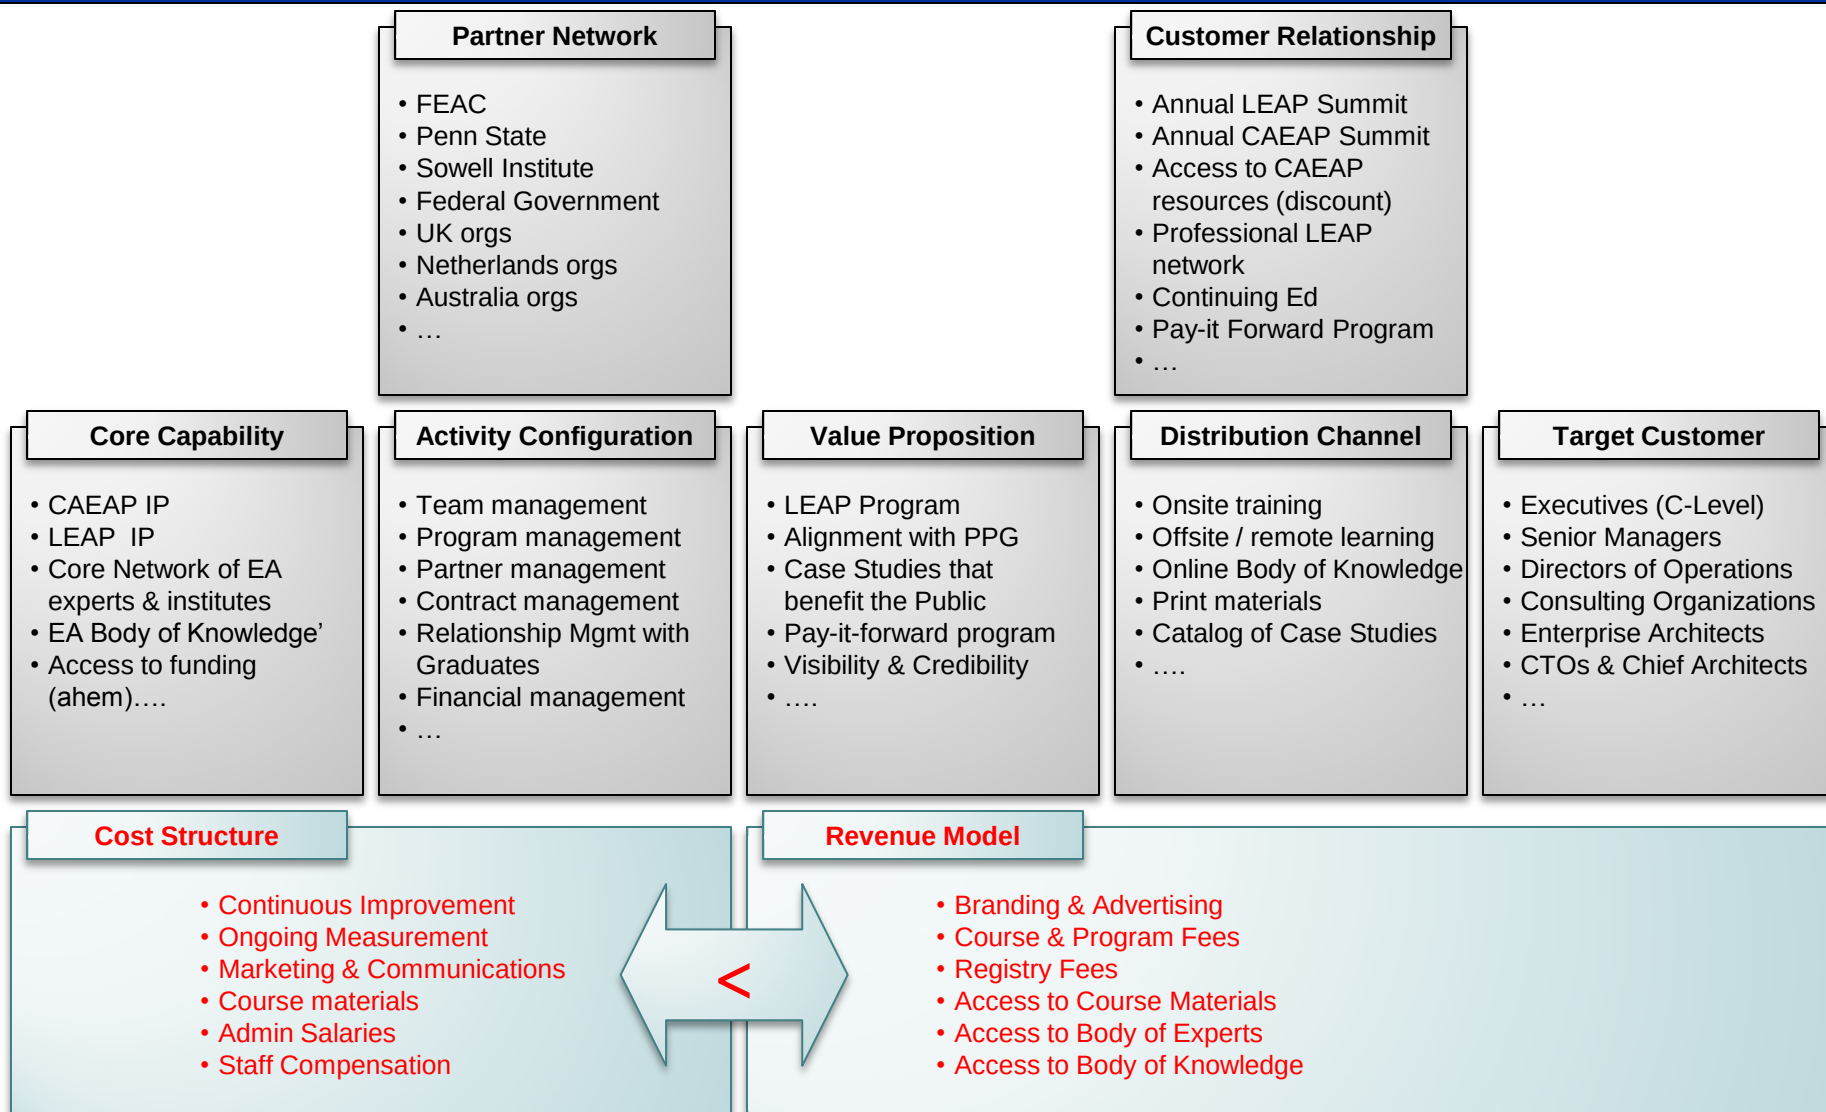

LEAP Business Model

LEAP Business Model (Detailed)

Program Marketing

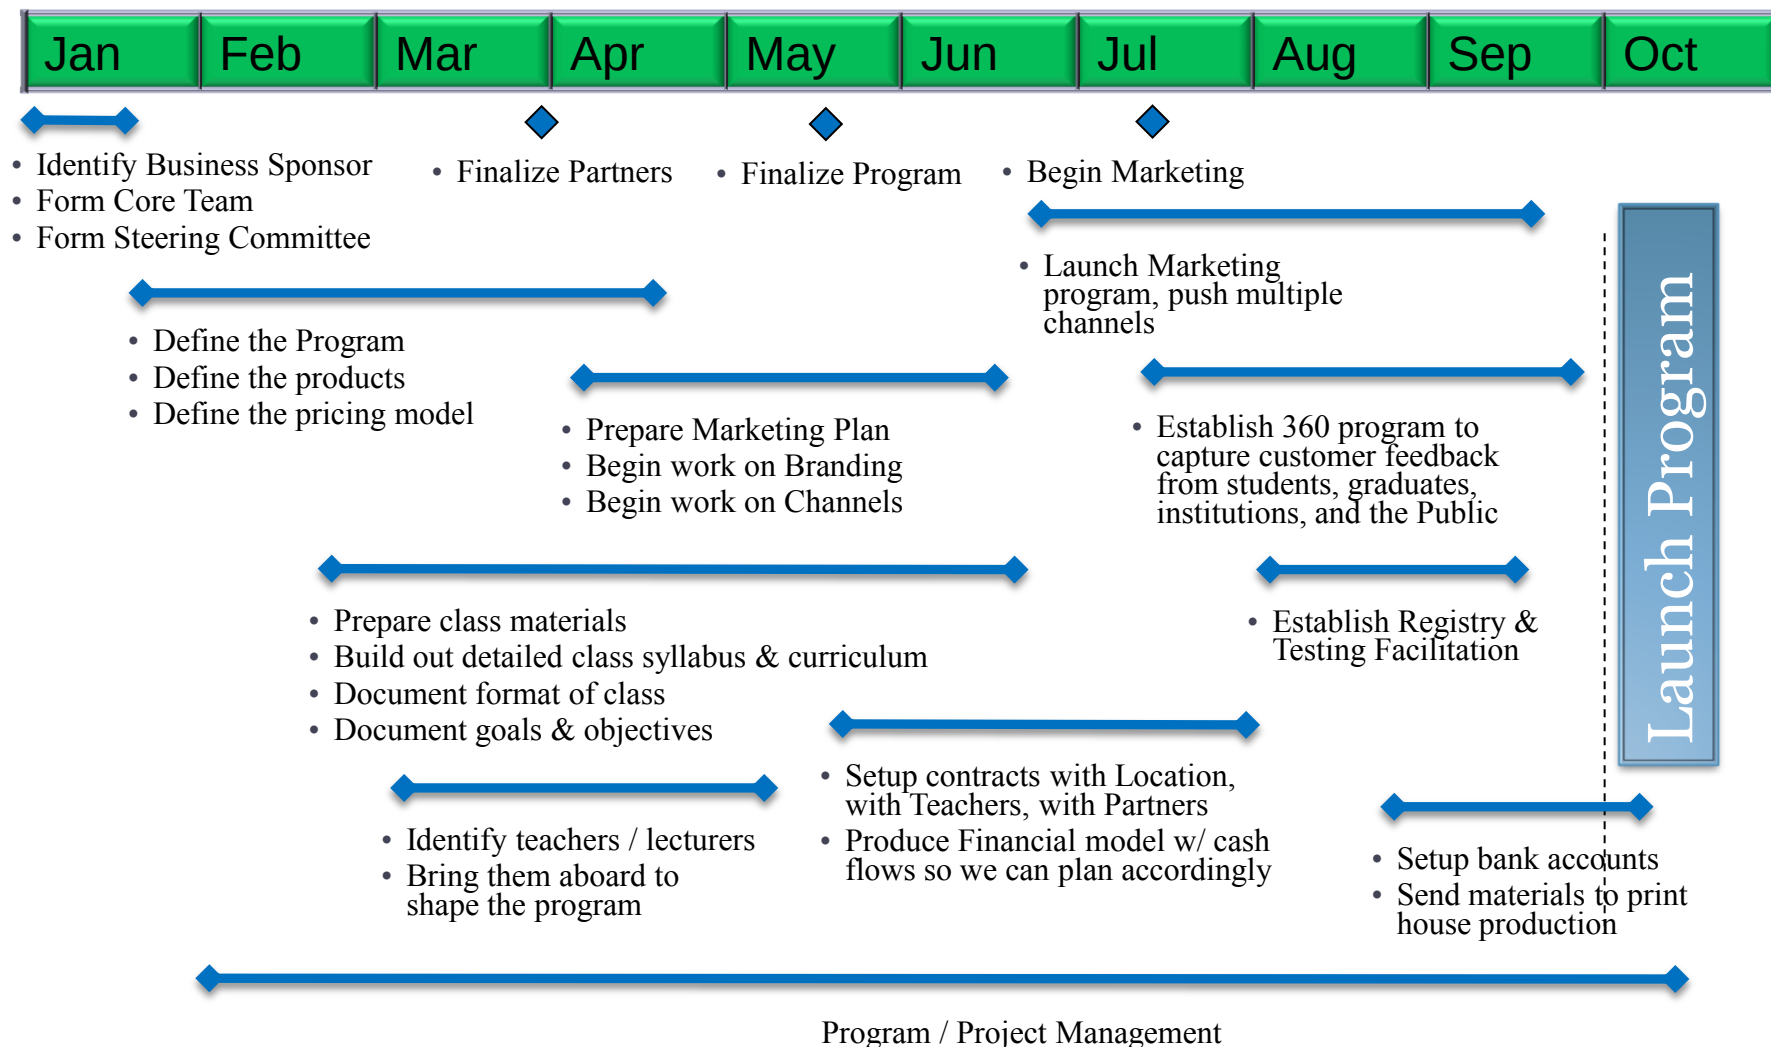

- Suggest a 2-pronged approach (which can be done in parallel)
 - First, we can promote what we have with what we know today based on survey data from several resources.
 - **Develop logo, branding, & messaging**
 - **Develop partnerships with institutions & orgs**
 - **Align with Penn State to center education at this location**
 - **Establish the registry**
 - **Promote benefits to Professional, Practice, Public**
 - Second, CAEAP needs a marketing function to be bootstrapped to align with other marketing orgs
 - **Obtain funding to conduct our own market research**
 - **Build branding for CAEAP & other product lines**
 - **Coordinate external communications & messaging**

Pricing Model

- **These are just suggestions, but we need to figure this out up front....**

Product Offering	Channel	Pricing
Certification Program	Formal Class (5-Day)	\$15,000
Certification Program (case studies)	Seminar Series (3 months) (visiting lecturers / diff. locs)	\$35,000
Thesis / Final Exam	Offline submission/ sitting	\$2,000
Classes / ongoing credits	1 day or 2 day	\$1000 / day
Certification Levels 1, 2, 3	Exams	\$500 / sitting
Workshops	2-day / 3-day	\$3000 / \$5000
Contributing White papers	Access to Body of Knowledge	\$500/yr – individual \$3,000/yr – company
Coaching / Consulting	Access to Body of Experts	\$250/hr + T&E

Program Roadmap

- **Alignment with executive's desired outcomes**
- **Clarity of program description & name (is this a course or program) ?**
- **Clarity on audience (execs or mgmt or architects...)**
- **Sufficient difference maker for customers – career opportunities & improved value**
- **What portion is classroom and what can be delivered online (it's 2010...when do we embrace technology ?)**
- **Is there a case study with the course ?**
- **Do we build up a library of case history for the practice ?**
- **Encroachment from other players (IASA, OG) is a growing concern ?**
- **Does the curriculum cover how and architect behaves and the personal competencies / characteristics ?**
- **How well does this align with Ruth Malin's material (see Cutter article) ?**
- **How will does this align with Deb Lowell's research on what CEO's want ?**
- **How well does this align with Mark Lane's EA survey ?**
- **What are the pre-requisites ?**
- **What problems will the graduate be able to handle going forward & how valuable is that to the Public ?**
- **Is there a pay-it-forward component to this leadership model ?**
