

Eric Darrisaw is Agile Fractal Grid Energy Director. His responsibilities include micro grid project development, energy technology commercialization, Financial Modeling, Digital Marketplaces, Software Defined Electricity SaaS and Building Electrical Grid Optimization Services. Eric recently received funding from New York State Energy Research and Development Agency (NYSERDA) to develop the first Community Distributed Generation project in NYC South Bronx. The partnership includes Bronx Community Board 3, SunSwarm, (US Department of Energy funded Community Solar Data Analytics Platform) In Time of Need Inc, a African American faith based Community Development Corporation and The Green The Church AA CDC Energy Development Initiative. Eric is a member of the 2030 District Network and NYC professional services committee. Agile Fractal Grid, NYC 2030 District and The Digital Twin Consortium are introducing a new Digital Twin pilot internship program for Engineering Students. City University of New York Building Performance Labs, Pratt Institute, City Zenith , Buldee (Energy Efficiency Software Company) and Brooklyn Navy Yard Development Corporation are providing assistance to NYC 2030 District energy engineering training program.
