Enterprise Architecture Awards 2016 — Enterprise Architecture As A Verb, Not A Noun

Posted by [Alex Cullen](#) on September 19, 2016

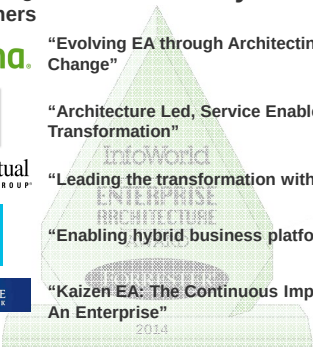

21 Recommendations [0 comments](#) [f Share](#) [t Tweet](#) [in Share](#) [+ Share](#)

Forrester and InfoWorld set the theme for this year's awards as 'Speed and Responsiveness – And EA'. The underlying premise is that business leaders are demanding that their business moves faster – everything from updating digital capabilities to bringing more agility in how firms work with customers and suppliers. In theory, enterprise architecture is a key capability to moving faster. But how can EA

Predictions 2017: Enterprise Architecture In 2017 And Beyond

November 3, 2016

This is the Predictions report in **The EA Practice Playbook For 2016**

Why Read This Report

As firms address digital transformation and how to become customer-led, insights-driven, fast, and connected, enterprise architecture (EA) has tremendous value to offer. To see how the practice of EA will evolve over the next few years, one must look at leading practices today, including the winners of the 2016 ForresterInfoWorld Enterprise Architecture Awards. A key theme: EA's value proposition shifts from "doing architecture" to empowering firms to make the best pragmatic decisions.

Key Takeaways

Insights, Not Architecture, Will Be EA's Value Proposition

Given the dynamics of technology, markets, and customer preferences today, EA is more essential than ever. But mainstream EA programs are evolving too slowly. We find that leading programs focus on providing insights, not on creating architectures.

Insights, Not Architecture, Will Be EA's Value Proposition

› Leading EA Programs Empower Distributed Decision-making. They:

- Work differently and with engage more broadly
- Play more influential roles in the strategy-to-execution process
- Organize around business, deliver through services

Insights, Not Architecture, Will Be EA's Value Proposition

- › Leading EA programs change their focus, methodology, and measurement
 - Shift focus from platforms to solutions
 - Use just enough methodology, drawing from a wider range of approaches
 - Track value-based metrics, not activities
