

A Shared Perspective on Enterprise Architecture – Changing The Story

Valhalla systems is growing quickly, and has just acquired rival Odin electronics. Major changes are needed to bring about efficiency and maintain shareholder value. Susan Voyager, EA, convinces COO Tom Hardes to try Enterprise Architecture.

Susan adopts a useful framework and develops architectural artifacts and a roadmap. She recommends consolidating programs, which makes stakeholder Frank Wall unhappy. He confronts Susan and challenges the role of Enterprise Architecture.

Susan quickly draws on industry standard descriptions of Enterprise Architecture, produced by FEAPO, and published by respected organizations. The collective credibility of these organizations bolsters Susan's standing and Frank's objection is tabled.

Susan's recommendations turn into a series of business initiatives that produce a simple, feasible, and effectively integrated organization in record time. Enterprise Architecture takes hold in Valhalla systems.

Accelerating ICT innovation is driving rapid rate of organizational change. Orgs need a standing strategic change function: *Enterprise Architecture Strategic Planning*

EA Planning ensures that an enterprise acquires the assets and builds the capabilities that it needs to achieve its strategies. Continuous change has made this an intensely complex problem.

Enterprise Architects enable the design and implementation of organizational change, developing initiatives and plans that link an organization's strategy with its execution.

EA provides a map to achieve org goals by traveling the most effective path, reducing the conflicts between initiatives and ensuring that key requirements are addressed in a timely manner.

Enterprise Architects:

- Model the present
- Design for the future
- Develop Roadmaps
- Assist with Strategy
- Develop Measures
- Plan Technology
- Manage Risk
- Govern investments

EA gets involved when:

- Assess value of change
- Capabilities needed
- Manage dependencies
- Mergers & Acquisitions
- Sudden environ. change
- Emerging ICT trends
- Data/Security crisis

EA Strategic Planning

1. Strategy Development
2. Plan to Execute
3. Execute
4. Ongoing Monitoring
5. Governance

Key EA Skills

- Communication
- Relationship Mgmt
- Negotiation
- Systems Thinking
- Visual Modelng
- ICT proficiency
- Business depth

We Are Here

Shared Perspectives on EA Targeting 15-20 pages

1. Introduction to EA Strategic Planning
2. Why do we need EA Strategic Planning
3. What does your EA do
4. When does your EA get engaged
 1. Overview
 2. Specific Events
 3. Business team impacts
5. What does your EA deliver
 1. Questions answered by EA
 2. Documents and Deliverables
6. EA Strategic Planning Process
 1. EA in Strategy Development
 2. EA in Planning for Execution
 3. EA during Program Execution
 4. EA during ongoing delivery
 5. EA in Org Governance
7. Building the EA function
 1. Skills needed for EA
 2. Where are skills acquired
 3. Role Mobility
 4. Impact of Org Structure on EA
 5. Who does EA function report to
8. Different opinions about the meaning of the term "Enterprise Architecture"
9. References and Links

Co-published Summary – 3-5 pp.

1. Introduction
2. Value Proposition
3. Engagement Model
4. Questions answered
5. Deliverables
6. Planning Process

Long lasting impact

- Cited in Research
- Shared in Discussions
- Adopted in Orgs
- Educational Materials
- Wikipedia articles
- Input to EABOK
- Reinforces Ontology

**Only FEAPO can
produce this impact**
