

Building a Value Driven RFP Model

Outline

- Vision
 - Objectives
 - Benefits
 - Reference Model
 - Model Decomposition
 - Program Overview
-
- Phase 1 – Build (Cost Containment)
 - Phase 2 – Extend (Value Enablement)
 - Phase 3 – Explore (Driving Innovation)

Vision

To create an RFP model that encapsulates the value provided by the enterprise platform to help marketing, sales, and customers realize the full potential of this business investment.

Objectives

- Reduce the amount of time required to prepare RFP responses to customers in the pipeline.
- Reduce the amount of effort required to prepare RFP responses to customers in the pipeline.
- Increase the likelihood that the RFP process will create clear separation between enterprise and its competitors.
- Increase the likelihood that enterprise sales staff are more effective in front of customers.
- Increase the likelihood that customers perceive the enterprise platform as more than just another portfolio management tool.

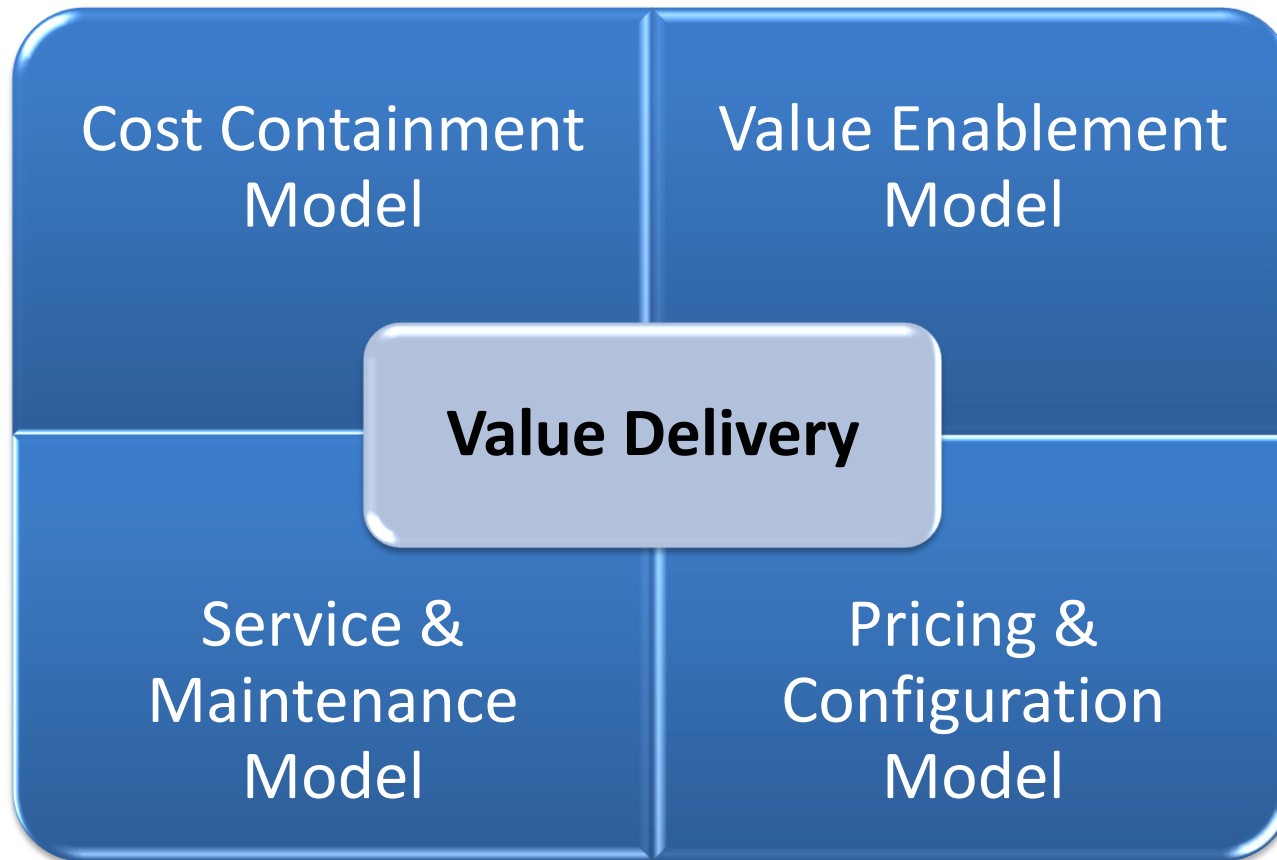

Objectives

- Increase the likelihood that marketing is able to position the enterprise platform as a value enabler.
- Reduce the likelihood that customers perceive the enterprise value proposition as one based in cost containment.
- Increase the likelihood that the enterprise platform can be positioned to address a wider list of desired outcomes in the areas of business planning & strategy.

Benefits

- Sales:
 - Will be able to differentiate enterprise from the competition by clearly articulating the value of its products & services throughout the sales engagement, through the RFP process, and over the duration of the customer relationship (post-sales).
- Marketing:
 - Will be able to improve the messaging on the products & services for potential customer and existing customers.
 - Will be able to better prioritize the product portfolio to address gaps in the value delivery against the product roadmap.
- Product Development:
 - Will be able to incorporate new ideas and technology to optimize value delivery by more efficiently aligning investments against prioritized value delivery opportunities.

Reference Model

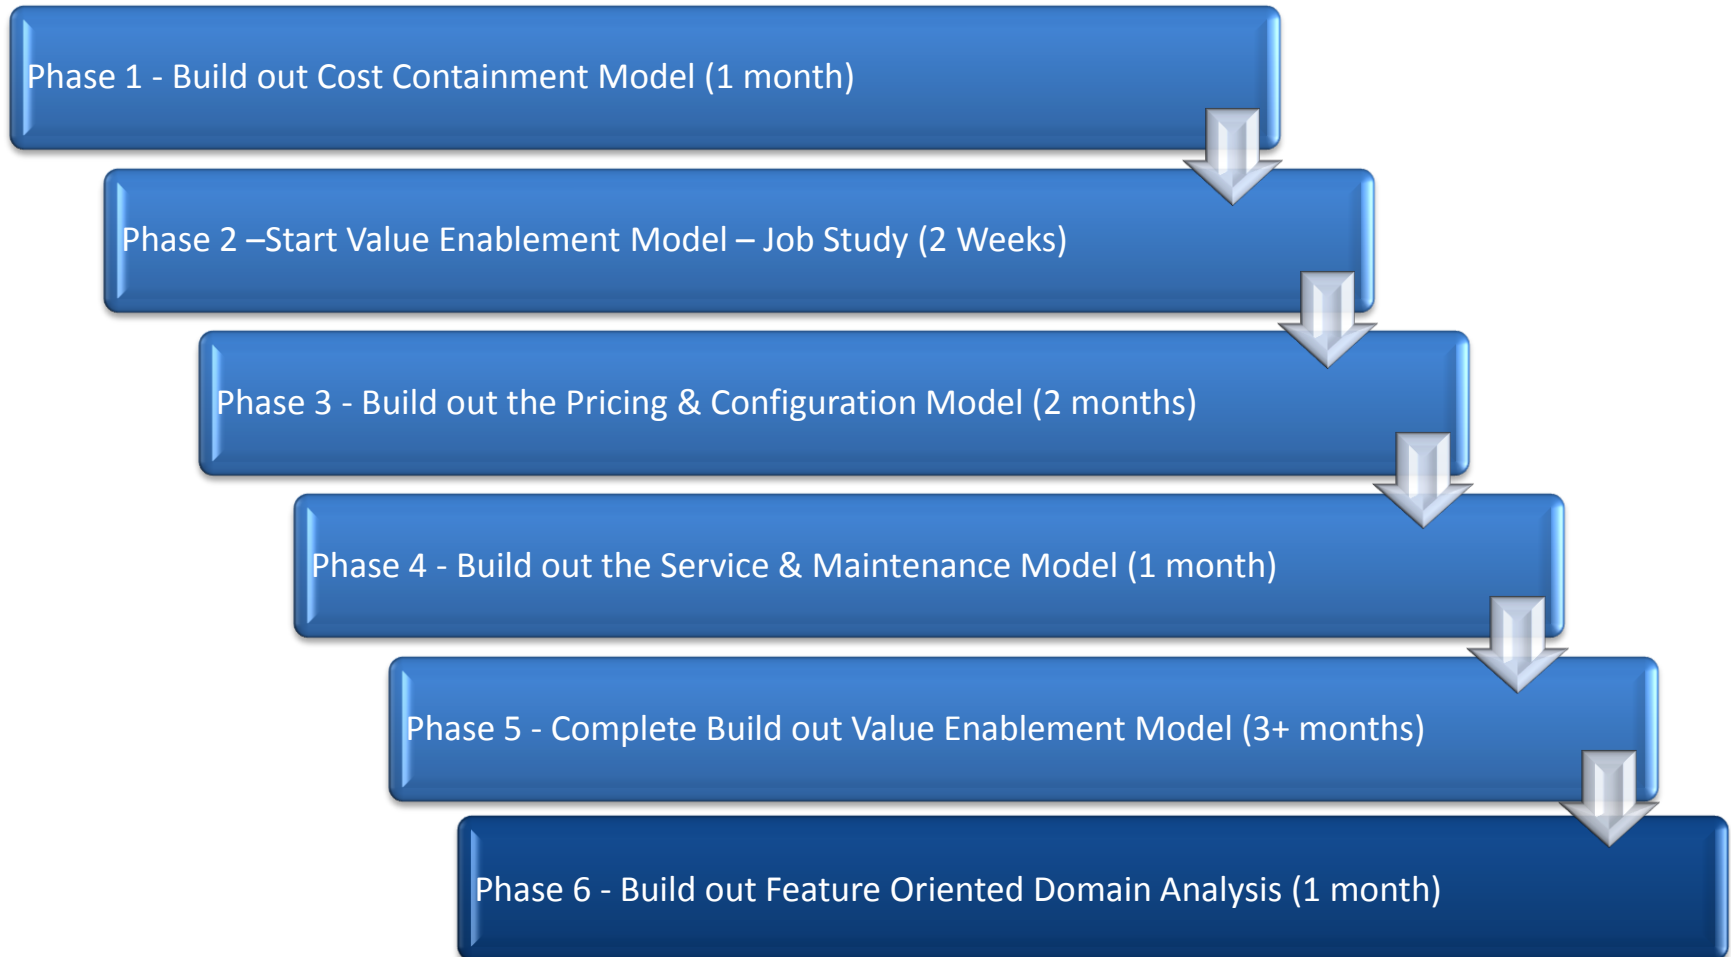

Model Decomposition

- **Value Enablement Model**
 - Functional Jobs
 - Horizontal (across value network)
 - Vertical (across organizational depts.)
 - Consumption Chain Jobs
 - Indirect jobs used to support main functional job(s)
 - Emotional Jobs
 - Hidden jobs that often go overlooked, but are key to obtaining loyalty
- **Pricing & Configuration Model**
 - Job-Based Delivery Model
 - Hardware Model
 - Software & Licensing Model
 - Value-based Pricing
 - Platform Extensions Model
- **Service & Maintenance Model**
 - Horizontal Integration across the value network
 - Vertical Integration throughout the organization
 - Implementation Planning & Execution
 - Education Services (by Value Delivery Bundle)
 - Maintenance & Support Model
- **Cost Containment Model**
 - Time Saved
 - Resources Saved
 - Lost Opportunities Saved
 - Risk Mitigation Expenses Saved

Program Overview

- A phased approach will be used to define and extend the federated model for planning, delivering, and measuring value that enterprise can provide to customers with their products & services. The following is a list of deliverables which will be delivered in phases:
 - Build out Cost Containment Model
 - Start Value Enablement Model – Job Study
 - Build out the Pricing & Configuration Model
 - Build out the Service & Maintenance Model
 - Complete Build out Value Enablement Model
 - Map Jobs to Domain Analysis
 - Build out Feature Oriented Domain Analysis
